

## LIST OF FIGURES

- Figure 1-01: Develop! How much is too much? [Source: B Mickewaith [www.brianmicklethwait.com] \_p 18
- Figure 1-02: Dividing the population [Source: Collage by Author] \_p 19
- Figure 1-03: Site choice [Source: Author] \_p 20
- Figure 1-04: Movement patterns in the city centre [Source: Author] \_p 21
- Figure 2-05: Diagram indicating the sources of greenhouse gasses [Source: IPPC website accessed 26 Feb 2010] \_p 31
- Figure 2-06: The sectors causing in GHG emissions [Source IEC 2009 p 8] \_p 31
- Figure 2-07: Predicted food and water shortages caused by climate change [Source: Author] \_p 36
- Figure 2-08: Heatwaves and increasing affect of fire ["The great Chicago Fire" - [http://contentloco.com/travel/top-things-you-should-know-about-chicago.aspx] \_p 38
- Figure 2-09: From Pretoria to Tshwane – compact to low density [Source: Author] \_p 40
- Figure 2-10: Adapting buildings for climate change [Source: Author] \_p 42
- Figure 2-11: Warning systems in buildings [Source: Author] \_p 44
- Figure 2-12: Energy consumed by transport increase with 40% [1990 - 2007] [Source: Author] \_p 45
- Figure 2-13: Six priority corridors in Tshwane [Source: Author] \_p 47
- Figure 2-14: Routes and Feeder Zones in Tshwane [Source: Author] \_p 48
- Figure 2-15: Schematic layout of Two BRT lines [Source Tshwane Bus Rapid Transit [BRT] Operational Plan p 69] \_p 49
- Figure 2-16: Proposal for station by KM architects [Souecw: Anon] \_p 50
- Figure 2-17: Movement in the forecourt [Source: Author] \_p 51
- Figure 2-18: Interim proposals for Pretoria Main Station [Source: KWP Landscape Architects] \_p 51
- Figure 2-19: Proposal for Pretoria Main Station [Source: SSI and KM Architects] \_p 52
- Figure 2-21: Generic Platform design and exemplary stations [Source: Rapid Bus Transit Planning Guide p 365, 366,369] \_p 54
- Figure 2-22: Articulated busses used on Johannesburg [Source: Author] \_p 56
- Figure 2-23: Busses displacing single occupant vehicles [Source: Wright& Hook2007 p 86] \_p 57
- Figure 2-24: Size of block and street. [Source: Jan Gehl p110] \_p 60
- Figure 2-25: Integrating planting and the building [Source: author] \_p 61
- Figure 2-26: Making use of a double skin to accommodate heating or cooling of structure [Source: Author] \_p 62
- Figure 2-27: Allowing passive solar energy into the building structure [Source: Holm 1996, p71+72] \_p 63
- Figure 2-28: Wind rose of prevailing winds in Tshwane [Source: Holm 1996, p70] \_p 64
- Figure 2-29: Making use of evaporative cooling, high mass and night cooling to ventilate the structure [Source: Author]. \_p 65
- Figure 2-30: The type of material determined by their life cycles [Source: author] \_p 66
- Figure 2-31: Methods of achieving multi functional components [Source: Author] \_p 69
- Figure 3-01: BRT systems developing throughout South Africa [Source: Author] \_p 80
- Figure 3-02: The development of Pretoria [Source: Jordaan 1989, p27] \_p 81
- Figure 3-03: Fragmented, decentralised city after Apartheid urban planning [Source: Author] \_p 83
- Figure 3-04: Position of precinct within city of Tshwane [Source: Author] \_p 84
- Figure 3-05: Panoramas of site and precinct [Source: Author] \_p 85
- Figure 3-06: Mapping of movement patterns within the city [ Source: Author] \_p 87
- Figure 3-07: The site [Source: Author] \_p 88
- Figure 3-08: Entrance front of Pretoria Main Station [Source: Author] \_p 89
- Figure 3-09: Entrance to Gautrain and Old Accounting building [Source: Author] \_p 89
- Figure 3-10: Commuters waiting for the train [Source: Author] \_p 90
- Figure 3-12: Existing vendor stalls, Old Tavern and empty regional bus station [Source: Author] \_p 91
- Figure 3-11: Current users of the public transport system[Source: Author] \_p 91
- Figure 3-13: Views of station building, garden square, Victoria Hotel and bridge entrance [Source: Author] \_p 93
- Figure 3-14: View of the station Station and Station Square [Source: Author] \_p 95
- Figure 4-01: The vision for the precinct - developing the barrier [Source: Author] \_p 98
- Figure 4-02: The three frameworks impacting on the study area [Source: Author]. \_p 99
- Figure 4-03: Detail of TOSF's vision for Salvokop [ Source: TOSF, p 107] \_p 100
- Figure 4-04: The vision of the Rekgabisa Tshwane framework [Source: Rekgabisa Tswane, p. 6] \_p 101
- Figure 4-05: The proposed framework for Salvokop, by GAPP [Source: Culmatrix] \_p 102
- Figure 4-06: A synergy of the three frameworks in the study area [Source: Author] \_p 103
- Figure 4-07: The vision for the precinct - linking Salvokop [Source: Author] \_p 104
- Figure 4-08: Zoning and layout of Salvokop and the Station precinct [Source: Author] \_p 105
- Figure 4-09: Phasing of the LINK framework [Source: Author] \_p 106
- Figure 4-10: Station orientation [Source: Author] \_p 107
- Figure 4-11: Connecting Salvokop [Source: Author] \_p 107
- Figure 4-12: Existing houses in Salvokop [Source: Author] \_p 108
- Figure 4-13: Salvokop serving the city [Source: Author] \_p 110
- Figure 4-14: Depiction of the development and key moments of the site [Source: Author] \_p 113
- Figure 4-15: The station for the "natives" to the west [Source: Author] \_p 114
- Figure 4-16: Plan of the urban layout 1894 [Source: UP archives, Van der Waal collection] \_p 115
- Figure 4-18: The first station buildings constructed in 1894 [Source: UP archives, Van der Waal collection] \_p 115
- Figure 4-17: Schematic layout of the old station [Source: Author] \_p 115
- Figure 4-19: Schematic layout of Pretoria Main Station [Source: Author] \_p 116
- Figure 4-20: Facade of the station [Source: Author] \_p 117
- Figure 4-21: The Station Square before 1954. [Source: Anon] \_p 118
- Figure 4-22: [Next page]Changes and adaptations in history [Source: Author] \_p 118
- Figure 4-23: Three layers of intervention - responding to the existing station and its context [Source: Author] \_p 121
- Figure 4-24: The different processes to take in account when doing a life cycle assessment [Source: Author]. \_p 125
- Figure 4-25: Embodied energy and carbon footprint of Rea Vaya Station [Source: Author] \_p 131
- Figure 5-01: Adaptable stations [Ruano 1998, p.40] \_p 139
- Figure 5-02: Plan and section of station [Ruano 1998, p.40] \_p 139
- Figure 5-03: Conceptual section [Source: Author] \_p 140
- Figure 5-04: Movement and plan [Source: Author] \_p 140
- Figure 5-05: Placing of station on street edge [Source: www.greatbuildings.com,accessed 14 March 2010] \_p 141
- Figure 5-06: Photographs of Rea Vaya Prototype [Source: Author]. \_p 142

- Figure 5-07: Conceptual elevation of BRT station [Source: Author] \_p 143  
Figure 5-08: Conceptual plan layout [Source: Author] \_p 143  
Figure 5-09: Plan and sections of intervention  
[Source: Architects' Website - www.mirallestagliabue.com]. \_p 145  
Figure 5-11: Plan adapted to landscape and linking functions [Source: Author] \_p 146  
Figure 5-10: Model of intervention, adapted to site  
[Source: Architects' Website - www.mirallestagliabue.com]. \_p 146  
Figure 5-12: Conceptual plan and sections, structure conveying  
movement and change [ Source: Author] \_p 147  
Figure 5-13: Threshold to entrance to building [Source: Author] \_p 147  
Figure 5-14: Entrance very large scale [Source: Author] \_p 147  
Figure 5-15: Ventilation and energy systems working in an integrated whole  
[Source Melbourne city council website: [http://www.melbourne.vic.gov.au
