Pretoria City - A spatial field in tension

Tensions as a generator for a mixed-use intervention -

The Intersection of Nelson Mandela Drive and Skinner Street.
Submitted in partial fulfilment of the requirements for the degree of Magister in Architecture (Professional) in the Faculty of Engineering, Built Environment and Information Technology.

Abstract Architecture is a representation of our society’s aspirations and of our social, economic and political paradigms. Since 1994, has the city of Pretoria been successfully represented? Does the city succeed architecturally in creating space that is democratic and that embraces our country’s diversity?

The large influx of people within the city of Pretoria has created a terrain consisting of a series of contradictions and conflicts. These conflicts and contradictions within the city are a result of social, economic, spatial, physical and historical tensions that exist within society’s social, economic and political paradigms. Physical and spatial reactions have occurred as a result of these tensions that exist within the city of Pretoria.

This dissertation will explore these urban spaces that are in tension and investigate what opportunities and limitations such spaces offer the city of Pretoria. The objective is to consider what architectural intervention will arise from the resolution, synthesis or conflict of these tensions. Can these spaces that are in tension within the city foster a new post-apartheid way of city making?
## Table of Contents

01. Preface  
02. Introduction  
   Background  
03. Research Methodology  
04. The Idea of Tensions  
   Economic Tension  
   1. Informal | Formal  
   Social Tensions  
   1. Identity | Universality  
   2. Exclusive | Inclusive  
   3. Self | Other  
   4. Displacement | Emplacement  
   Contextual Tensions  
   1. Conservation | Development  
   Precedent: Spittelau Viaducts Social Housing Project  
   2. Natural Landscapes | Manmade Natural Landscapes | Manmade Built Landscapes  
   3. Park | City  
05. A Site in Tension  
   Historical Tension  
   Old | New  
   Precedent: Pratt Institute Art School Extension  
   Physical Tensions  
   Passive | Active + Pedestrian | Vehicular  
   Precedent: Olympic Sculpture Park  
   Object | Subject  
   Spatial Tensions  
   Centre | Edge  
   Public | Private  
   Design Objectives  
   Precedent: Möbius House  
   Precedent: Yokohama International Port Terminal  
   Proposal  
   Objective  
06. Design Development  
   A Spatial Field in Tension  
   Concept : A Hybrid of Relationships  
   Passive | Active  
   Program - Mixed-use development  
   Park | City  
   Old | New  
07. Technical Development  
08. Bibliography  
09. Addendum  
   Final Presentation Drawings
