CHAPTER THREE

THE MCDC-PROJECT

SECTION A : GENERAL 97
1 Introduction 97
2 Background issues to the corridor development approach in the Republic of South Africa 97

SECTION B : THE KEY FOCUS OF THE MCDC-PROJECT 99
1 Introduction 99
2 Background to the initiation of the MCDC-project 99
2.1 General 99
2.2 The discussions between the Department of Transport and the former Greater Pretoria Metropolitan Council 101
3 The project processes of the MCDC-project 102
3.1 Nov 1995 to April 1996 102
SECTION C : THE PROJECT STRATEGIES OF THE MCDC-PROJECT

1  Introduction 115
2  The project phases 116
2.1  Phase 1 – Growth and Development Strategy 116
2.2  Phase 2 – Klip-and Kruisfontein – fast-track implementation 116
3  The planning processes for preparing the Growth and Development Strategy 116
3.1  The technical process 116
3.2  The participation process 118
4  The project steps of Phase One 118
4.1  Delineation of the study area and goal and objective formulation 118
4.2  The multi-dimensional background research 120
4.3  The data base and planning models developed for the MCDC-project 121
4.4  The integrated development framework 128
4.5  The multi-dimensional project identification and prioritisation 134
4.6  The project details and project impact assessments of the identified strategic projects of the MCDC-project 138
4.7  The implementation plan for the MCDC-project 139
4.8  The Integrated Growth and Development Implementation Strategy of the MCDC-project 139

SECTION D : SUCCESS STORIES

1  Introduction 144
2  Successes with the implementation of the strategic projects 145
2.1  The focused marketing strategy 145
2.2  The small business support programme 146
2.3  The public support programme 146
2.4  The development of an Urban Port 147
2.5  Developing an open space policy for the MCDC area 148
2.6  Promoting densification in the MCDC area 149
2.7  Intensification and diversification in the MCDC area 149
2.8  Establishing a mobility link across the Witwatersberg (PWV-9-link) 149
2.9  Creating a link to the Witwatersrand area 151
2.10  Establishing activity spines in the MCDC area 151
2.11  Developing a public passenger transport system for the MCDC area 152
2.12  Establishing guidelines for the development of an interface between different transport modes (Inter-Modal Transfer Facilities) 153
2.13  Instituting Vocational Education and Training (VET) and Entrepreneurial Development Programmes 153
2.14  Human development information and support centres 153
3  Successes with the implementation of other MCDC-initiated projects 155
3.1  The MCDC demonstration project 155
3.2  Other projects 157
4  Summary 158

Die Mabopane-Centurion Ontwikkelingskorridor: 'n Historiese Analise van Suksesse en Beperkinge en Voorstelle vir Verbetering
deur
Hendrik Andries Kleynhans
Professor Doktor M C Oranje
Departement Stads en Streekbeplanning
Magister in Stads en Streekbeplanning

Opsomming

Die Mabopane-Centurion Ontwikkelingskorridor-inisiatief is deur die voormalige Groter Pretoria Metropolitanse Raad in samewerking met ander regeringsfere in 1995 geloods. Dit het geskied by wyse van 'n beplanningsproses, as deel van 'n nasionale inisiatief wat bekend staan as die "Four Cities"-projek op stedelike ontwikkelingskorridors (die "Four Cities" verwys na Kaapstad, Johannesburg, Durban en Pretoria). Die loodsing het plaasgevind as 'n resultaat van die regering se intensie om die integrasie tussen grondgebruik- en vervoerbeplanning (ter bevordering van die ontwikkeling en gebruik van effikiewe en bekostigbare openbare vervoerstelsels), veral op stedelike vlak in die Republiek van Suid Afrika te ondersoek en te bespoedig. Gedurende hierdie tyd het die nasionale regering 'n siening uitgespreek dat ontwikkelingskorridors geag moet word as 'n potensiële mekanisme vir sosiale opheffing, die bevordering van ekonomiese ontwikkeling en die aanspreek van die segregasie wat deur die apartheidsbeleid in Suid Afrikaanse stede en dorpe veroorsaak was.

Hierdie verhandeling fokus gevolglik op die historiese verloop van die Mabopane-Centurion Ontwikkelingskorridor se ontwikkelingsproses sedert die eerste gesprekke waartydens die projek in November 1995 geinisieer is, tot waar die projek met 'n 3-jaar implementeringsfase gevorder het. Die navorsing bespreek die fokus van hierdie projek, projekprosesse, suksesse in terme van projek-implementering, asook die institutionele reelings vir projekuitvoering. Beperkinge wat met die implementering van die projek-konsepte, strategiêe en geïdentificeerde projekte ervaar is, word ook bespreek.

Ten einde die beperkinge aan te spreek en die implimentering van die Mabopane-Centurion Ontwikkelingskorridorprojek te bevorder, is ander stedelike en nasionale korridors, plaaslik en internasionaal, nagevors. Die doel van die navorsing was om vas te stel hoe ander korridor-ontwikkelingsprojekte hanteer word in terme van beplanning en ontwikkeling, asook om potensiële oplossings en voorstelle te vind vir probleme wat in die Mabopane-Centurion Ontwikkelingskorridor ervaar word. Hierdie nagevorsde korridorprojekte was ook in terme van hul eie onderliggende fokusse, projekstrategiêe, institutionele onderbou en suksesverhale bestudeer. Die resultaat van die navorsing is
voortspruitend gebruik vir die formulering van 'n teoretiese raamwerk wat gebruik kon word as basis vir korridor ontwikkeling.

Met betrekking tot die gebruik van die teoretiese raamwerk tot voordeel van hierdie verhandeling, dien dit vermeld te word dat die teoretiese raamwerk as inset gebruik word tot die formulering van voorstelle ter verbetering van die ontwikkelingskonsepte, -strategieë en projek-implimentering van die Mabopane-Centurion Ontwikkelingskorridor. Hierdie voorstelle konsentreer veral op die verbetering van die institusionele basis wat insluit die verkryging van doelgerigte politieke steun en leierskap vir die korridorprojek, veral wat die projek-implimentering aan betref. Ander voorstelle fokus op die opstel van 'n meer gedetailleerde korridorbestuursplan ten einde verdere beplannings- en implimenterings-aksies gefasseer te laat plaasvind, sowel as voorstelle ter bevordering van die implementering van ekonomiese en sosiale ontwikkelings-inisiatiewe in die korridor.

Die verhandeling word afgesluit met aanbevelings vir oorweging deur die Stad van Tshwane Metropolitaanse Munisipaliteit, ter bevordering van die implementering van die Mabopane-Centurion Ontwikkelingskorridorprojek.

The Mabopane-Centurion Development Corridor: A historical analysis of successes and constraints and proposals for improvement

by Hendrik Andries Kléynhans

Professor Doctor M C Oranje

Department Town and Regional planning

Masters in Town and Regional Planning

Summary

The Mabopane-Centurion Development Corridor-initiative was initiated in 1995 by the former Greater Pretoria Metropolitan Council in co-operation with other spheres of government. This took place in the form of a planning process as part of a national initiative known as the "Four Cities"-project on urban development corridors (the "Four Cities" refer to Cape Town, Johannesburg, Durban and Pretoria). Its initiation was as a result of the government's intention to investigate and accelerate the integration between land-use and transport planning (to promote the development and use of effective and affordable public transport), especially on urban levels in the Republic of South Africa.

During this period, a view was expressed by the national government that development corridors were to be regarded as a potential mechanism for social upliftment, the promotion of economic development and the addressing of segregation caused by apartheid policies in South African cities and towns.

As a result, this dissertation, therefore, focuses on the historic sequence of events of the development processes of the Mabopane-Centurion Development Corridor, since the first discussion during which the project was initiated in November 1995, up to where the project progressed over a 3-year implementation phase. The research discusses the focus of the project, the project processes, successes in terms of project implementation, as well as the institutional arrangements for project execution. Constraints with the implementation of the project concept, strategies and identified projects, are also discussed.

To address the constraints and to promote the implementation of the Mabopane-Centurion Development Corridor-project, other urban and national corridors, locally and abroad, were researched. The purpose of the research was to determine how other development corridor projects are dealt with in terms of planning and development, as well as to determine potential solutions and proposals for addressing the constraints experienced by the Mabopane-Centurion Development Corridor. Each of the researched development corridor projects were studied in terms of their underlying project focuses, project strategies, institutional arrangements and success stories. The results of the
research were used for the formulation of a theoretical framework that could be used as basis for corridor development.

With regard to the use of the theoretical framework to the benefit of this dissertation, it is necessary to note that the theoretical framework is used as input for the formulation of proposals for the improvement of the development concepts, strategies and project implementation of the Mabopane-Centurion Development Corridor. These proposals concentrate on the improvement of the institutional basis, which include getting purpose-directed political support and leadership, especially as far as project implementation is concerned. Other proposals focus on the compilation of a more detailed corridor management plan, so as to ensure that further planning and implementation actions take place in a phased manner, as well as proposals to promote the implementation of economic and social development initiatives in the corridor.

The dissertation concludes with recommendations to be considered by the City of Tshwane Metropolitan Municipality with a view to improve the implementation of the Mabopane-Centurion Development Corridor-project.
