

Corrigendum – BEJ5881

Continuous succinic acid production by *Actinobacillus succinogenes* in a biofilm reactor: Steady-state metabolic flux variation, *Biochemical Engineering Journal*, Vol. 85, pp. 107, 2014.

There are two errors in the paper. Both errors are found on **page 5**.

The first occurs in **Equation 3**, where the **coefficient of CO₂** should read 1 instead of 2. Equation 3 should therefore be:

The second error is found in **Equation 6** where the **coefficient of 4 for CO₂** should be replaced with a 2. Therefore, Equation 6 should read:

The corrected versions of the equations reflect complete carbon balances for each scenario. The errors do not detract from the results and conclusions arrived at in the paper and as such, the corrigendum serves merely to maintain the integrity of the paper.
