

Subject index

ONDERSTEPSPOORT JOURNAL OF VETERINARY RESEARCH

Volume 60, Numbers 1–4, 1993

Articles presented in proceedings are indexed according to key words of the [session title] and the article title

Abdominal organs

- The topography of the thoracic and abdominal organs of the Nile crocodile (*Crocodylus niloticus*)—N.J. VAN DER MERWE and S.H. KOTZE 219–222

Abomasum

- Ultrastructure of the myenteric ganglia in the rumen, reticulum, omasum and abomasum of grey, white and black Karakul lambs—H.B. GROENEWALD 189–195

Acari

- Dermacentor rhinocerinus* (Denny, 1843) (Acari: Ixodida: Ixodidae): redescription of the male, female and nymph and first description of the larva—J.E. KEIRANS 59–68
- Rhipicephalus aquatilis* sp. nov. (Acari: Ixodidae), a new tick species parasitic mainly on the sitatunga, *Tragelaphus spekei*, in East and Central Africa—JANE B. WALKER, J.E. KEIRANS and R.G. PEGRAM 205–210
- Rhipicephalus exophthalmos* sp. nov., a new tick species from southern Africa, and redescription of *Rhipicephalus oculatus* Neumann, 1901, with which it has hitherto been confused (Acari: Ixodida: Ixodidae)—J.E. KEIRANS, JANE B. WALKER, I.G. HORAK and HELOISE HEYNE 229–246

Acetone

- Cyclic fluctuations in acetone concentrations in the blood and milk of clinically healthy dairy cows—HANLIE E.K. WINTERBACH, P.J. APPS, W. GIESECKE and INGE-MARIE PETZER 247–255

African horsesickness

- Circulation of African horsesickness virus in zebra (*Equus burchelli*) in the Kruger National Park, South Africa, as measured by the prevalence of type specific antibodies—B.J.H. BARNARD 111–117

Alcelaphine herpesvirus I

- Generation of a nucleic acid probe specific for the alcelaphine herpesvirus I and its use for the detection of malignant catarrhal fever virus DNA in blue wildebeest calves (*Connochaetes taurinus*)—ANITA L. MICHEL 87–93

Alestes imberi

- Parasites of South African freshwater fish. III. *Rhabdochona* (*Rhabdochona*) *versterae* n. sp. (Nematoda: Rhabdochonidae) from the spot-tailed robber *Alestes imberi* Peters, 1852—J. BOOMKER and ANNIE J. PETTER 23–27

Analysis

- [The molecular epidemiology of African Lyssaviruses] Molecular analysis of the rabies-related viruses from Ethiopia—T. MEBATSION, J.H. COX and K.K. CONZELMANN 289–294
- [The molecular epidemiology of African Lyssaviruses] Rabies in wild and domestic carnivores of Africa: epidemiological and historical associations determined by limited sequence analysis—J.S. SMITH, P.A. YAGER and L.A. ORCIARI 307–314

Antibody

- Prevalence of antibodies against some equine viruses in zebra (*Equus burchelli*) in the Kruger National Park 1991–1992—B.J.H. BARNARD and J.T. PAWESKA 175–179
- Rabies and bats in a rabies-endemic area of southern Africa: application of two commercial test kits for antigen and antibody detection—M.J. OELOFSEN and M.S. SMITH 257–260
- [The molecular epidemiology of African Lyssaviruses] Monoclonal antibody studies on rabies-related viruses—A.A. KING 283–287

- Antigen**
 Rabies and bats in a rabies-endemic area of southern Africa: application of two commercial test kits for antigen and antibody detection—M.J. OELOFSEN and M.S. SMITH 257–260
 [The molecular epidemiology of African Lyssaviruses] Rabies virus antigenicity: an overview—P. COULON, F. LAFAY and A. FLAMAND 271–275
- Balanoposthitis**
 The identification of *Mycoplasma mycoides mycoides* LC as the aetiological agent of balanoposthitis and vulvovaginitis in sheep in South Africa—C.J.V. TRICHARD, P. JORDAAN, L. PROZESKY, ELSIE P. JACOBSZ and MARIJKE M. HENTON 29–37
- Bat-eared fox**
 [Rabies in wildlife] The bat-eared fox: a prime candidate for rabies vector?—J.A.J. NEL 395–397
 [Rabies in wildlife] Bat-eared fox behavioural ecology and the incidence of rabies in the Serengeti National Park—B. MAAS 389–393
 [Rabies in wildlife] Rabies in bat-eared foxes in South Africa—G.R. THOMSON and C.D. MEREDITH 399–403
- Bats**
 Rabies and bats in a rabies-endemic area of southern Africa: application of two commercial test kits for antigen and antibody detection—M.J. OELOFSEN and M.S. SMITH 257–260
- Blood**
 Cyclic fluctuations in acetone concentrations in the blood and milk of clinically healthy dairy cows—HANLIE E.K. WINTERBACH, P.J. APPS, W. GIESECKE and INGE-MARIE PETZER 247–255
- Bluetongue**
 Detection of bluetongue virus RNA in cell cultures and in the central nervous system of experimentally infected mice using *in situ* hybridization—ESTELLE H. VENTER, J.J. VAN DER LUGT and G.H. GERDES 39–45
- Blue wildebeest**
 Generation of a nucleic acid probe specific for the alcelaphine herpesvirus I and its use for the detection of malignant catarrhal fever virus DNA in blue wildebeest calves (*Connochaetes taurinus*)—ANITA L. MICHEL 87–93
- Brucellosis**
 The use of EDTA in the microtitration serum agglutination test in bovine brucellosis—A.D. POTTS 47–50
- Camallanidae**
 Parasites of South African freshwater fish. IV. Description of *Spirocamallanus daleneae* n. sp. (Nematoda: Camallanidae) from *Synodontis zambezensis* Peters, 1852 (Mochokidae) with comments on *Spirocamallanus spiralis* (Baylis, 1923)—J. BOOMKER 131–137
- Canis mesomelas**
 [Rabies in wildlife] Biology of the black-backed jackal *Canis mesomelas* with reference to rabies—A.A. MCKENZIE 367–371
- Central nervous system**
 Detection of bluetongue virus RNA in cell cultures and in the central nervous system of experimentally infected mice using *in situ* hybridization—ESTELLE H. VENTER, J.J. VAN DER LUGT and G.H. GERDES 39–45
- Cheetah**
 Lymphocyte blast transformation responses and restriction fragment length analysis in the cheetah—J.A. SPENCER 211–217
- Chemotherapy**
 Pathogenicity and chemotherapy of *Plasmodium durae* in experimentally infected domestic turkeys—F.W. HUCHZERMAYER 103–110
- Connochaetes taurinus**
 Generation of a nucleic acid probe specific for the alcelaphine herpesvirus I and its use for the detection of malignant catarrhal fever virus DNA in blue wildebeest calves (*Connochaetes taurinus*)—ANITA L. MICHEL 87–93
- Conservation**
 [Rabies in wildlife] Rabies and wildlife: a conservation problem?—D.W. MACDONALD 351–355
- Cowdria ruminantium**
 An *in vitro* test to demonstrate the inhibitory effect of homologous immune serum on the infectivity of *Cowdria ruminantium*—J.L. DU PLESSIS 69–73
- Crocodile**
 The topography of the thoracic and abdominal organs of the Nile crocodile (*Crocodylus niloticus*)—N.J. VAN DER MERWE and S.H. KOTZE 219–222
- Crocodylus niloticus**
 The topography of the thoracic and abdominal organs of the Nile crocodile (*Crocodylus niloticus*)—N.J. VAN DER MERWE and S.H. KOTZE 219–222
- Crocuta crocuta**
 [Rabies in wildlife] Social systems and behaviour of the African wild dog *Lycaon pictus* and the spotted hyaena (*Crocuta crocuta*), with special reference to rabies—M.G.L. MILLS 405–409

- Cynictis penicillata**
 [Rabies in wildlife] The role of the yellow mongoose (*Cynictis penicillata*) in the epidemiology of rabies in South Africa—preliminary results—F. CHAPARRO and J.J. ESTERHUYSEN 373–377
 [Rabies in wildlife] A systematic and population genetic approach to the rabies problem in the yellow mongoose (*Cynictis penicillata*)—P.J. TAYLOR 379–387
- Cystidicolidae**
 Parasites of South African freshwater fish. V. Description of two new species of the genus *Spinitectus* Fourment, 1883 (Nematoda: Cystidicolidae)—J. BOOMKER 139–145
- Dairy cows**
 Cyclic fluctuations in acetone concentrations in the blood and milk of clinically healthy dairy cows—HANLIE E.K. WINTERBACH, P.J. APPS, W. GIESECKE and INGE-MARIE PETZER 247–255
- Dermacentor rhinoceros**
Dermacentor rhinoceros (Denny, 1843) (Acari: Ixodida: Ixodidae): redescription of the male, female and nymph and first description of the larva—J.E. KEIRANS 59–68
- Diptera**
 A redescription of *Lipoptena binocula* (Speiser, 1908) (Hippoboscidae: Diptera), with notes on its biology and comparisons with the other two flies of this genus in South Africa—ELIZE J. VISAGIE 51–58
- DNA**
 Generation of a nucleic acid probe specific for the alcelaphine herpesvirus I and its use for the detection of malignant catarrhal fever virus DNA in blue wildebeest calves (*Connochaetes taurinus*)—ANITA L. MICHEL 87–93
- Dog**
 [Rabies in wildlife] Social systems and behaviour of the African wild dog *Lycaon pictus* and the spotted hyaena (*Crocuta crocuta*) with special reference to rabies—M.G.L. MILLS 405–409
 [Rabies in wildlife] Aspects of rabies infection and control in the conservation of the African wild dog (*Lycaon pictus*) in the Serengeti Region, Tanzania—S.C. GASCOYNE, A.A. KING, M.K. LAURENSEN, M. BORNER, B. SCHILDGER and J. BARRAT 415–420
 [Development of bait vaccines for the control of canine rabies] Dog ecology in eastern and southern Africa: implications for rabies control—B.D. PERRY 429–436
 [Development of bait vaccines for the control of canine rabies] A dog ecology study in an urban and a semi-rural area of Zambia—K.K.I.M. DE BALOGH, A.I. WANDELER, and F.-X. MESLIN 437–443
 [Development of bait vaccines for the control of canine rabies] Features of dog ecology relevant to rabies spread in Machakos District, Kenya—P.M. KITALA, J.J. MCDERMOTT, M.N. KYULE and J.M. CATHUMA 445–449
 [Development of bait vaccines for the control of canine rabies] The delivery of oral rabies vaccines to dogs: an African perspective—B.D. PERRY and A.I. WANDELER 451–457
 [Development of bait vaccines for the control of canine rabies] Bait formulation and distribution for oral rabies vaccination of domestic dogs: an overview—S.B. LINHART 479–490
- Domestic animals**
 Parasites of domestic and wild animals in South Africa. XXXII. Ixodid ticks on scrub hares in the Transvaal—I.G. HORAK, A.M. SPICKETT, L.E.O. BRAACK and B.L. PENZHORN 163–174
 [The molecular epidemiology of African Lyssaviruses] Rabies in wild and domestic carnivores of Africa: epidemiological and historical associations determined by limited sequence analysis—J.S. SMITH, P.A. YAGER and L.A. ORCIARI 307–314
- Donkeys**
 Serological evidence of equine arteritis virus in donkeys in South Africa—J.T. PAWESKA and B.J.H. BARNARD ... 155–158
- Ecology**
 [Rabies in wildlife] Bat-eared fox behavioural ecology and the incidence of rabies in the Serengeti National Park—B. MAAS 389–393
 [Development of bait vaccines for the control of canine rabies] Dog ecology in eastern and southern Africa: implications for rabies control—B.D. PERRY 429–436
 [Development of bait vaccines for the control of canine rabies] A dog ecology study in an urban and a semi-rural area of Zambia—K.K.I.M. DE BALOGH, A.I. WANDELER, and F.-X. MESLIN 437–443
 [Development of bait vaccines for the control of canine rabies] Features of dog ecology relevant to rabies spread in Machakos District, Kenya—P.M. KITALA, J.J. MCDERMOTT, M.N. KYULE and J.M. CATHUMA 445–449
- EDTA**
 The use of EDTA in the microtitration serum agglutination test in bovine brucellosis—A.D. POTTS 47–50
- Elephant**
 Osteology of the thoracic limb of the African elephant (*Loxodonta africana*)—MALIE M.S. SMUTS and A.J. BEZUIDENHOUT 1–14
- Epidemiology**
 [The molecular epidemiology of African Lyssaviruses] The rabies virus genome: an overview—N. TORDO and A. KOUKNETZOFF 263–269

[The molecular epidemiology of African Lyssaviruses] Rabies virus antigenicity: an overview—P. COULON, F. LAFAY and A. FLAMAND	271–275
[The molecular epidemiology of African Lyssaviruses] Taxonomy and evolutionary studies on Lyssaviruses with special reference to Africa—H. BOURHY, B. KISSI and N. TORDO	277–282
[The molecular epidemiology of African Lyssaviruses] Monoclonal antibody studies on rabies-related viruses—A.A. KING	283–287
[The molecular epidemiology of African Lyssaviruses] Molecular analysis of the rabies-related viruses from Ethiopia—T. MEBATSION, J.H. COX and K.K. CONZELMANN	289–294
[The molecular epidemiology of African Lyssaviruses] Canid and viverrid rabies viruses in South Africa—A.A. KING, C.D. MEREDITH and G.R. THOMSON	295–299
[The molecular epidemiology of African Lyssaviruses] Molecular epidemiology of rabies virus in South Africa—L.H. NEL, G.R. THOMSON and B.F. VON TEICHMAN	301–306
[The molecular epidemiology of African Lyssaviruses] Rabies in wild and domestic carnivores of Africa: epidemiological and historical associations determined by limited sequence analysis—J.S. SMITH, P.A. YAGER and L.A. ORCIARI	307–314
[The molecular epidemiology of African Lyssaviruses] Molecular epidemiology of Lyssaviruses: focus on the glycoprotein and pseudogenes—N. TORDO, H. BADRANE, H. BOURHY and D. SACRAMENTO	315–323
[Rabies in wildlife] The role of the yellow mongoose (<i>Cynictis penicillata</i>) in the epidemiology of rabies in South Africa—preliminary results—F. CHAPARRO and J.J. ESTERHUYSEN	373–377
Epithelium	
Ultrastructure of the epithelium of the rumen, reticulum and omasum of grey, white and black Karakul lambs—H.B. GROENEWALD	197–204
Equine virus	
Prevalence of antibodies against some equine viruses in zebra (<i>Equus burchelli</i>) in the Kruger National Park 1991–1992—B.J.H. BARNARD and J.T. PAWESKA	175–179
Serological evidence of equine arteritis virus in donkeys in South Africa—J.T. PAWESKA and B.J.H. BARNARD	155–158
<i>Equus burchelli</i>	
Circulation of African horsesickness virus in zebra (<i>Equus burchelli</i>) in the Kruger National Park, South Africa, as measured by the prevalence type specific antibodies—B.J.H. BARNARD	111–117
Prevalence of antibodies against some equine viruses in zebra (<i>Equus burchelli</i>) in the Kruger National Park 1991–1992—B.J.H. BARNARD and J.T. PAWESKA	175–179
<i>Escherichia coli</i>	
The use of the GENETRAK <i>Escherichia coli</i> probe kit for the detection of three atypical <i>E. coli</i> isolates—A.J. DAVIS and R.R. BRAGG	153–154
Fish	
Parasites of South African freshwater fish. III. <i>Rhabdochona (Rhabdochona) versterae</i> n. sp. (Nematoda: Rhabdochonidae) from the spot-tailed robber <i>Alestes imber</i> Peters, 1852—J. BOOMKER and ANNIE J. PETTER	23–27
Parasites of South African freshwater fish. IV. Description of <i>Spirocamallanus daleneae</i> n. sp. (Nematoda: Camallanidae) from <i>Synodontis zambezensis</i> Peters, 1852 (Mochokidae) with comments on <i>Spirocamallanus spiralis</i> (Baylis, 1923)—J. BOOMKER	131–137
Parasites of South African freshwater fish. V. Description of two new species of the genus <i>Spinitectus</i> Fourment, 1883 (Nematoda: Cystidicolidae)—J. BOOMKER	139–145
Fleas	
Fleas and lice on scrub hares (<i>Lepus saxatilis</i>) in South Africa—J.P. LOUW, I.G. HORAK and L.E.O. BRAACK	95–101
Flies	
A redescription of <i>Lipoptena binocula</i> (Speiser, 1908) (Hippoboscidae: Diptera), with notes on its biology and comparisons with the other two flies of this genus in South Africa—ELIZE J. VISAGIE	51–58
Foot-and-mouth disease	
<i>Rhipicephalus zambeziensis</i> unlikely to transmit foot-and-mouth disease virus—C. DE W.J. VAN VUUREN, E. BLOUIN, F.T. POTGIETER and G.R. THOMSON	75–77
Fox	
[Rabies in wildlife] Current status of fox rabies in Europe—J. BARRAT and M.F.A. AUBERT	357–364
[Rabies in wildlife] Bat-eared fox behavioural ecology and the incidence of rabies in the Serengeti National Park—B. MAAS	389–393
[Rabies in wildlife] The bat-eared fox: a prime candidate for rabies vector?—J.A.J. NEL	395–397
[Rabies in wildlife] Rabies in bat-eared foxes in South Africa—G.R. THOMSON and C.D. MEREDITH	399–403
[Development of bait vaccines for the control of canine rabies] Rabies eradication in Belgium by fox vaccination using vaccinia-rabies recombinant virus—B. BROCHIER and P.-P. PASTORET	469–475

- Francolins**
A host-parasite list of the haematozoa of domestic poultry in sub-Saharan Africa and the isolation of *Plasmodium durae* Herman from turkeys and francolins in South Africa—F.W. HUCHZERMEYER 15–21
- Glycoprotein**
[The molecular epidemiology of African Lyssaviruses] Molecular epidemiology of Lyssaviruses: focus on the glycoprotein and pseudogenes—N. TORDO, H. BADRANE, H. BOURHY and D. SACRAMENTO 315–323
- Haematozoa**
A host-parasite list of the haematozoa of domestic poultry in sub-Saharan Africa and the isolation of *Plasmodium durae* Herman from turkeys and francolins in South Africa—F.W. HUCHZERMEYER 15–21
- Haemophilus paragallinarum***
Plasmid-encoded NAD independence in some South African isolates of *Haemophilus paragallinarum*—R.R. BRAGG, L. COETZEE and J.A. VERSCHOOR 147–152
Monoclonal antibody characterization of South African field isolates of *Haemophilus paragallinarum*—R.R. BRAGG, L. COETZEE and J.A. VERSCHOOR 181–187
- Helmeted guineafowls**
Lice on helmeted guineafowls at five localities in South Africa—J.P. LOUW, I.G. HORAK, SANTA MEYER and R.D. PRICE 223–228
- Hippoboscidae**
A redescription of *Lipoptena binocula* (Speiser, 1908) (Hippoboscidae: Diptera), with notes on its biology and comparisons with the other two flies of this genus in South Africa—ELIZE J. VISAGIE 51–58
- Homologous immune serum**
An *in vitro* test to demonstrate the inhibitory effect of homologous immune serum on the infectivity of *Cowdria ruminantium*—J.L. DU PLESSIS 69–73
- Hybridization**
Detection of bluetongue virus RNA in cell cultures and in the central nervous system of experimentally infected mice using *in situ* hybridization—ESTELLE H. VENTER, J.J. VAN DER LUGT and G.H. GERDES 39–45
- Isolates**
Plasmid-encoded NAD independence in some South African isolates of *Haemophilus paragallinarum*—R.R. BRAGG, L. COETZEE and J.A. VERSCHOOR 147–152
The use of the GENETRAK *Escherichia coli* probe kit for the detection of three atypical *E. coli* isolates—A.J. DAVIS and R.R. BRAGG 153–154
Monoclonal antibody characterization of South African field isolates of *Haemophilus paragallinarum*—R.R. BRAGG, L. COETZEE and J.A. VERSCHOOR 181–187
- Ixodid ticks**
Parasites of domestic and wild animals in South Africa. XXXII. Ixodid ticks on scrub hares in the Transvaal—I.G. HORAK, A.M. SPICKETT, L.E.O. BRAACK and B.L. PENZHORN 163–174
- Ixodidae**
Dermacentor rhinoceros (Denny, 1843) (Acari: Ixodida: Ixodidae): redescription of the male, female and nymph and first description of the larva—J.E. KEIRANS 59–68
Rhipicephalus aquatilis sp. nov. (Acari: Ixodidae), a new tick species parasitic mainly on the sitatunga, *Tragelaphus spekei*, in East and Central Africa—JANE B. WALKER, J.E. KEIRANS and R.G. PEGRAM 205–210
Rhipicephalus exophthalmos sp. nov., a new tick species from southern Africa, and redescription of *Rhipicephalus oculatus* Neumann, 1901, with which it has hitherto been confused (Acari: Ixodida: Ixodidae)—J.E. KEIRANS, JANE B. WALKER, I.G. HORAK and HELOISE HEYNE 229–246
- Jackal**
[Rabies in wildlife] Jackal rabies in Zimbabwe—J. BINGHAM and C.M. FOGGIN 365–366
[Rabies in wildlife] Biology of the black-backed jackal *Canis mesomelas* with reference to rabies—A.A. MCKENZIE 367–371
[Development of bait vaccines for the control of canine rabies] Oral rabies vaccination of jackals: progress in Zimbabwe—J. BINGHAM, B.D. PERRY, A.A. KING, C.L. SCHUMACHER, M. AUBERT, A. KAPPELER, C.M. FOGGIN, F.W.G. HILL and A. AUBERT 477–478
- Karakul**
Ultrastructure of the myenteric ganglia in the rumen, reticulum, omasum and abomasum of grey, white and black Karakul lambs—H.B. GROENEWALD 189–195
Ultrastructure of the epithelium of the rumen, reticulum and omasum of grey, white and black Karakul lambs—H.B. GROENEWALD 197–204
- Larva**
Dermacentor rhinoceros (Denny, 1843) (Acari: Ixodida: Ixodidae): redescription of the male, female and nymph and first description of the larva—J.E. KEIRANS 59–68

<i>Lepus saxatilis</i>	
Fleas and lice on scrub hares (<i>Lepus saxatilis</i>) in South Africa—J.P. LOUW, I.G. HORAK and L.E.O. BRAACK . . .	95–101
Lice	
Fleas and lice on scrub hares (<i>Lepus saxatilis</i>) in South Africa—J.P. LOUW, I.G. HORAK and L.E.O. BRAACK . . .	95–101
Lice on helmeted guineafowls at five localities in South Africa—J.P. LOUW, I.G. HORAK, SANTA MEYER and R.D. PRICE	223–228
Limited sequence analysis	
[The molecular epidemiology of African Lyssaviruses] Rabies in wild and domestic carnivores of Africa: epidemiological and historical associations determined by limited sequence analysis—J.S. SMITH, P.A. YAGER and L.A. ORCIARI	307–314
<i>Lipoptena binocula</i>	
A redescription of <i>Lipoptena binocula</i> (Speiser, 1908) (Hippoboscidae: Diptera), with notes on its biology and comparisons with the other two flies of this genus in South Africa—ELIZE J. VISAGIE	51–58
Lovebirds	
Variation in clinical disease and species susceptibility to psittacine beak and feather disease in Zimbabwean lovebirds—N.D. KOCK, P.U. HANGARTNER and V. LUCKE	159–161
<i>Loxodonta africana</i>	
Osteology of the thoracic limb of the African elephant (<i>Loxodonta africana</i>)—MALIE M.S. SMUTS and A.J. BEZUIDENHOUT	1–14
<i>Lycaon pictus</i>	
[Rabies in wildlife] Social systems and behaviour of the African wild dog <i>Lycaon pictus</i> and the spotted hyaena (<i>Crocuta crocuta</i>) with special reference to rabies—M.G.L. MILLS	405–409
[Rabies in wildlife] Aspects of rabies infection and control in the conservation of the African wild dog (<i>Lycaon pictus</i>) in the Serengeti Region, Tanzania—S.C. GASCOYNE, A.A. KING, M.K. LAURENSEN, M. BORNER, B. SCHILDGER and J. BARRAT	415–420
Lymphocyte	
Lymphocyte blast transformation responses and restriction fragment length analysis in the cheetah—J.A. SPENCER	211–217
Lyssaviruses	
[The molecular epidemiology of African Lyssaviruses] The rabies virus genome: an overview—N. TORDO and A. KOUKNETZOFF	263–269
[The molecular epidemiology of African Lyssaviruses] Rabies virus antigenicity: an overview—P. COULON, F. LAFAY and A. FLAMAND	271–275
[The molecular epidemiology of African Lyssaviruses] Taxonomy and evolutionary studies on Lyssaviruses with special reference to Africa—H. BOURHY, B. KISSI and N. TORDO	277–282
[The molecular epidemiology of African Lyssaviruses] Monoclonal antibody studies on rabies-related viruses—A.A. KING	283–287
[The molecular epidemiology of African Lyssaviruses] Molecular analysis of the rabies-related viruses from Ethiopia—T. MEBATION, J.H. COX and K.K. CONZELMANN	289–294
[The molecular epidemiology of African Lyssaviruses] Canid and viverrid rabies viruses in South Africa—A.A. KING, C.D. MEREDITH and G.R. THOMSON	295–299
[The molecular epidemiology of African Lyssaviruses] Molecular epidemiology of rabies virus in South Africa—L.H. NEL, G.R. THOMSON and B.F. VON TEICHMAN	301–306
[The molecular epidemiology of African Lyssaviruses] Rabies in wild and domestic carnivores of Africa: epidemiological and historical associations determined by limited sequence analysis—J.S. SMITH, P.A. YAGER and L.A. ORCIARI	307–314
[The molecular epidemiology of African Lyssaviruses] Molecular epidemiology of Lyssaviruses: focus on the glycoprotein and pseudogenes—N. TORDO, H. BADRANE, H. BOURHY and D. SACRAMENTO	315–323
Malignant catarrhal fever	
Generation of a nucleic acid probe specific for the alcelaphine herpesvirus I and its use for the detection of malignant catarrhal fever virus DNA in blue wildebeest calves (<i>Connochaetes taurinus</i>)—ANITA L. MICHEL	87–93
Mice	
Detection of bluetongue virus RNA in cell cultures and in the central nervous system of experimentally infected mice using <i>in situ</i> hybridization—ESTELLE H. VENTER, J.J. VAN DER LUGT and G.H. GERDES	39–45
Milk	
Cyclic fluctuations in acetone concentrations in the blood and milk of clinically healthy dairy cows—HANLIE E.K. WINTERBACH, P.J. APPS, W. GIESECKE and INGE-MARIE PETZER	247–255
Monoclonal antibody	
Monoclonal antibody characterization of South African field isolates of <i>Haemophilus paragallinarum</i> —R.R. BRAGG, L. COETZEE and J.A. VERSCHOOR	181–187

- [The molecular epidemiology of African Lyssaviruses] Monoclonal antibody studies on rabies-related viruses—A.A. KING 283–287
- MSAT**
The use of EDTA in the microtitration serum agglutination test in bovine brucellosis—A.D. POTTS 47–50
- Mycoplasma mycoides mycoides* LC**
The identification of *Mycoplasma mycoides mycoides* LC as the aetiological agent of balanoposthitis and vulvovaginitis in sheep in South Africa—C.J.V. TRICHARD, P. JORDAAN, L. PROZESKY, ELSIE P. JACOBSZ and MARIJKE M. HENTON 29–37
- Myenteric ganglia**
Ultrastructure of the myenteric ganglia in the rumen, reticulum, omasum and abomasum of grey, white and black Karakul lambs—H.B. GROENEWALD 189–195
- NAD**
Plasmid-encoded NAD independence in some South African isolates of *Haemophilus paragallinarum*—R.R. BRAGG, L. COETZEE and J.A. VERSCHOOR 147–152
- Nematoda**
Parasites of South African freshwater fish. III. *Rhabdochona (Rhabdochona) versterae* n. sp. (Nematoda: Rhabdochoniidae) from the spot-tailed robber *Alestes imber* Peters, 1852—J. BOOMKER and ANNIE J. PETTER 23–27
Parasites of South African freshwater fish. IV. Description of *Spirocamallanus daleneae* n. sp. (Nematoda: Camallanidae) from *Synodontis zambezensis* Peters, 1852 (Mochokidae) with comments on *Spirocamallanus spiralis* (Baylis, 1923)—J. BOOMKER 131–137
Parasites of South African freshwater fish. V. Description of two new species of the genus *Spinitectus* Fourment, 1883 (Nematoda: Cystidicolidae)—J. BOOMKER 139–145
- Nymph**
Dermacentor rhinocerinus (Denny, 1843) (Acari: Ixodida: Ixodidae): redescription of the male, female and nymph and first description of the larva—J.E. KEIRANS 59–68
- Omasum**
Ultrastructure of the myenteric ganglia in the rumen, reticulum, omasum and abomasum of grey, white and black Karakul lambs—H.B. GROENEWALD 189–195
Ultrastructure of the epithelium of the rumen, reticulum and omasum of grey, white and black Karakul lambs—H.B. GROENEWALD 197–204
- Osteology**
Osteology of the thoracic limb of the African elephant (*Loxodonta africana*)—MALIE M.S. SMUTS and A.J. BEZUIDENHOUT 1–14
- Ostrich**
Ultrastructure of ostrich (*Struthio camelus*) spermatozoa: I. Transmission electron microscopy—J.T. SOLEY 119–130
- Parasites**
A host-parasite list of the haematozoa of domestic poultry in sub-Saharan Africa and the isolation of *Plasmodium durae* Herman from turkeys and francolins in South Africa—F.W. HUCHZERMAYER 15–21
Parasites of South African freshwater fish. III. *Rhabdochona (Rhabdochona) versterae* n. sp. (Nematoda: Rhabdochoniidae) from the spot-tailed robber *Alestes imber* Peters, 1852—J. BOOMKER and ANNIE J. PETTER 23–27
Parasites of South African freshwater fish. IV. Description of *Spirocamallanus daleneae* n. sp. (Nematoda: Camallanidae) from *Synodontis zambezensis* Peters, 1852 (Mochokidae) with comments on *Spirocamallanus spiralis* (Baylis, 1923)—J. BOOMKER 131–137
Parasites of South African freshwater fish. V. Description of two new species of the genus *Spinitectus* Fourment, 1883 (Nematoda: Cystidicolidae)—J. BOOMKER 139–145
Parasites of domestic and wild animals in South Africa. XXXII. Ixodid ticks on scrub hares in the Transvaal—I.G. HORAK, A.M. SPICKETT, L.E.O. BRAACK and B.L. PENZHORN 163–174
Rhipicephalus aquatilis sp. nov. (Acari: Ixodidae), a new tick species parasitic mainly on the sitatunga, *Tragelaphus spekei*, in East and Central Africa—JANE B. WALKER, J.E. KEIRANS and R.G. PEGRAM 205–210
- Pathogenicity**
Pathogenicity and chemotherapy of *Plasmodium durae* in experimentally infected domestic turkeys—F.W. HUCHZERMAYER 103–110
- Plasmid**
Plasmid-encoded NAD independence in some South African isolates of *Haemophilus paragallinarum*—R.R. BRAGG, L. COETZEE and J.A. VERSCHOOR 147–152
- Plasmodium durae***
A host-parasite list of the haematozoa of domestic poultry in sub-Saharan Africa and the isolation of *Plasmodium durae* Herman from turkeys and francolins in South Africa—F.W. HUCHZERMAYER 15–21

Pathogenicity and chemotherapy of <i>Plasmodium durae</i> in experimentally infected domestic turkeys—F.W. HUCHZERMAYER	103–110
Population genetics	
[Rabies in wildlife] A systematic and population genetic approach to the rabies problem in the yellow mongoose (<i>Cynictis penicillata</i>)—P.J. TAYLOR	379–387
Poultry	
A host-parasite list of the haematozoa of domestic poultry in sub-Saharan Africa and the isolation of <i>Plasmodium durae</i> Herman from turkeys and francolins in South Africa—F.W. HUCHZERMAYER	15–21
Probe	
Generation of a nucleic acid probe specific for the alcelaphine herpesvirus I and its use for the detection of malignant catarrhal fever virus DNA in blue wildebeest calves (<i>Connochaetes taurinus</i>)—ANITA L. MICHEL	87–93
The use of the GENETRAK <i>Escherichia coli</i> probe kit for the detection of three atypical <i>E. coli</i> isolates—A.J. DAVIS and R.R. BRAGG	153–154
Pseudogenes	
[The molecular epidemiology of African Lyssaviruses] Molecular epidemiology of Lyssaviruses: focus on the glycoprotein and pseudogenes—N. TORDO, H. BADRANE, H. BOURHY and D. SACRAMENTO	315–323
Psittacine beak and feather disease	
Variation in clinical disease and species susceptibility to psittacine beak and feather disease in Zimbabwean lovebirds—N.D. KOCK, P.U. HANGARTNER and V. LUCKE	159–161
Rabies	
Rabies and bats in a rabies-endemic area of southern Africa: application of two commercial test kits for antigen and antibody detection—M.J. OELOFSEN and M.S. SMITH	257–260
[The molecular epidemiology of African Lyssaviruses] The rabies virus genome: an overview—N. TORDO and A. KOUKNETZOFF	263–269
[The molecular epidemiology of African Lyssaviruses] Rabies virus antigenicity: an overview—P. COULON, F. LAFAY and A. FLAMAND	271–275
[The molecular epidemiology of African Lyssaviruses] Taxonomy and evolutionary studies on Lyssaviruses with special reference to Africa—H. BOURHY, B. KISSI and N. TORDO	277–282
[The molecular epidemiology of African Lyssaviruses] Monoclonal antibody studies on rabies-related viruses—A.A. KING	283–287
[The molecular epidemiology of African Lyssaviruses] Molecular analysis of the rabies-related viruses from Ethiopia—T. MEBATSION, J.H. COX and K.K. CONZELMANN	289–294
[The molecular epidemiology of African Lyssaviruses] Canid and viverrid rabies viruses in South Africa—A.A. KING, C.D. MEREDITH and G.R. THOMSON	295–299
[The molecular epidemiology of African Lyssaviruses] Molecular epidemiology of rabies virus in South Africa—L.H. NEL, G.R. THOMSON and B.F. VON TEICHMAN	301–306
[The molecular epidemiology of African Lyssaviruses] Rabies in wild and domestic carnivores of Africa: epidemiological and historical associations determined by limited sequence analysis—J.S. SMITH, P.A. YAGER and L.A. ORCIARI	307–314
[The molecular epidemiology of African Lyssaviruses] Molecular epidemiology of Lyssaviruses: focus on the glycoprotein and pseudogenes—N. TORDO, H. BADRANE, H. BOURHY and D. SACRAMENTO	315–323
[Rabies in wildlife] Rabies in southern Africa—R. SWANEPOEL, B.J.H. BARNARD, C.D. MEREDITH, G. BISHOP, G.K. BRÜCKNER, C.M. FOGGIN and O.J.B. HÜBSCHLE	325–346
[Rabies in wildlife] Wildlife rabies in perspective—A.I. WANDELER	347–350
[Rabies in wildlife] Rabies and wildlife: a conservation problem?—D.W. MACDONALD	351–355
[Rabies in wildlife] Current status of fox rabies in Europe—J. BARRAT and M.F.A. AUBERT	357–364
[Rabies in wildlife] Jackal rabies in Zimbabwe—J. BINGHAM and C.M. FOGGIN	365–366
[Rabies in wildlife] Biology of the black-backed jackal <i>Canis mesomelas</i> with reference to rabies—A.A. MCKENZIE	367–371
[Rabies in wildlife] The role of the yellow mongoose (<i>Cynictis penicillata</i>) in the epidemiology of rabies in South Africa—preliminary results—F. CHAPARRO and J.J. ESTERHUYSEN	373–377
[Rabies in wildlife] A systematic and population genetic approach to the rabies problem in the yellow mongoose (<i>Cynictis penicillata</i>)—P.J. TAYLOR	379–387
[Rabies in wildlife] Bat-eared fox behavioural ecology and the incidence of rabies in the Serengeti National Park—B. MAAS	389–393
[Rabies in wildlife] The bat-eared fox: a prime candidate for rabies vector?—J.A.J. NEL	395–397

- [Rabies in wildlife] Rabies in bat-eared foxes in South Africa—G.R. THOMSON and C.D. MEREDITH 399–403
- [Rabies in wildlife] Social systems and behaviour of the African wild dog *Lycaon pictus* and the spotted hyaena *Crocuta crocuta* with special reference to rabies—M.G.L. MILLS 405–409
- [Rabies in wildlife] Rabies in the Masai Mara, Kenya: preliminary report—K.A. ALEXANDER, J.S. SMITH, M.J. MAC-HARIA and A.A. KING 411–414
- [Rabies in wildlife] Aspects of rabies infection and control in the conservation of the African wild dog (*Lycaon pictus*) in the Serengeti Region, Tanzania—S.C. GASCOYNE, A.A. KING, M.K. LAURENSEN, M. BORNER, B. SCHILDGER and J. BARRAT 415–420
- [Development and bait vaccines for the control of canine rabies] Canine rabies—M. FEKADU 421–427
- [Development of bait vaccines for the control of canine rabies] Dog ecology in eastern and southern Africa: implications for rabies control—B.D. PERRY 429–436
- [Development of bait vaccines for the control of canine rabies] A dog ecology study in an urban and a semi-rural area of Zambia—K.K.I.M. DE BALOGH, A.I. WANDELER and F.-X. MESLIN 437–443
- [Development of bait vaccines for the control of canine rabies] Features of dog ecology relevant to rabies spread in Machakos District, Kenya—P.M. KITALA, J.J. MCDERMOTT, M.N. KYULE and J.M. CATHUMA 445–449
- [Development of bait vaccines for the control of canine rabies] The delivery of oral rabies vaccines to dogs: an African perspective—B.D. PERRY and A.I. WANDELER 451–457
- [Development of bait vaccines for the control of canine rabies] SAG-2 oral rabies vaccine—C.L. SCHUMACHER, P. COULON, F. LAFAY, J. BÉNÉJEAN, M.F.A. AUBERT, J. BARRAT, A. AUBERT and A. FLAMAND 459–462
- [Development of bait vaccines for the control of canine rabies] Recombinant rabies vaccines: efficacy assessment in free ranging animals—C.E. RUPPRECHT, C.A. HANLON, M. NIEZGODA, J.R. BUCHANAN, D. DIEHL and H. KOPROWSKI 463–468
- [Development of bait vaccines for the control of canine rabies] Rabies eradication in Belgium by fox vaccination using vaccinia-rabies recombinant virus—B. BROCHIER and P.-P. PASTORET 469–475
- [Development of bait vaccines for the control of canine rabies] Oral rabies vaccination of jackals: progress in Zimbabwe—J. BINGHAM, B.D. PERRY, A.A. KING, C.L. SCHUMACHER, M. AUBERT, A. KAPPELER, C.M. FOGGIN, F.W.G. HILL and A. AUBERT 477–478
- [Development of bait vaccines for the control of canine rabies] Bait formulation and distribution for oral rabies vaccination of domestic dogs: an overview—S.B. LINHART 479–490
- Recombinant virus**
- [Development of bait vaccines for the control of canine rabies] Recombinant rabies vaccines: efficacy assessment in free ranging animals—C.E. RUPPRECHT, C.A. HANLON, M. NIEZGODA, J.R. BUCHANAN, D. DIEHL and H. KOPROWSKI 463–468
- [Development of bait vaccines for the control of canine rabies] Rabies eradication in Belgium by fox vaccination using vaccinia-rabies recombinant virus—B. BROCHIER and P.-P. PASTORET 469–475
- Restriction fragment length analysis**
- Lymphocyte blast transformation responses and restriction fragment length analysis in the cheetah—J.A. SPENCER 211–217
- Reticulum**
- Ultrastructure of the myenteric ganglia in the rumen, reticulum, omasum and abomasum of grey, white and black Karakul lambs—H.B. GROENEWALD 189–195
- Ultrastructure of the epithelium of the rumen, reticulum and omasum of grey, white and black Karakul lambs—H.B. GROENEWALD 197–204
- Rhabdochona (*Rhabdochona*) versterae**
- Parasites of South African freshwater fish. III. *Rhabdochona* (*Rhabdochona*) *versterae* n. sp. (Nematoda: Rhabdochonidae) from the spot-tailed robber, *Alestes imber* Peters, 1852—J. BOOMKER and ANNIE J. PETTER 23–27
- Rhabdochonidae**
- Parasites of South African freshwater fish. III. *Rhabdochona* (*Rhabdochona*) *versterae* n. sp. (Nematoda: Rhabdochonidae) from the spot-tailed robber, *Alestes imber* Peters, 1852—J. BOOMKER and ANNIE J. PETTER 23–27
- Rhipicephalus aquatilis**
- Rhipicephalus aquatilis* sp. nov. (Acari: Ixodidae), a new tick species parasitic mainly on the sitatunga, *Tragelaphus spekei*, in East and Central Africa—JANE B. WALKER, J.E. KEIRANS and R.G. PEGRAM 205–210
- Rhipicephalus exophthalmos**
- Rhipicephalus exophthalmos* sp. nov., a new tick species from southern Africa, and redescription of *Rhipicephalus oculatus* Neumann, 1901, with which it has hitherto been confused (Acari: Ixodida: Ixodidae)—J.E. KEIRANS, JANE B. WALKER, I.G. HORAK and HELOISE HEYNE 229–246
- Rhipicephalus oculatus**
- Rhipicephalus exophthalmos* sp. nov., a new tick species from southern Africa, and redescription of *Rhipicephalus oculatus* Neumann, 1901, with which it has hitherto been confused (Acari: Ixodida: Ixodidae)—J.E. KEIRANS, JANE B. WALKER, I.G. HORAK and HELOISE HEYNE 229–246

<i>Rhipicephalus zambeziensis</i>	
<i>Rhipicephalus zambeziensis</i> unlikely to transmit foot-and-mouth disease virus—C. DE W.J. VAN VUUREN, E. BLOUIN, F.T. POTGIETER and G.R. THOMSON	75–77
RNA	
Detection of bluetongue virus RNA in cell cultures and in the central nervous systems of experimentally infected mice using <i>in situ</i> hybridization—ESTELLE H. VENTER, J.J. VAN DER LUGT and G.H. GERDES	39–45
Rumen	
Ultrastructure of the myenteric ganglia in the rumen, reticulum, omasum and abomasum of grey, white and black Karakul lambs—H.B. GROENEWALD	189–195
Ultrastructure of the epithelium of the rumen, reticulum and omasum of grey, white and black Karakul lambs—H.B. GROENEWALD	197–204
Scrub hares	
Fleas and lice on scrub hares (<i>Lepus saxatilis</i>) in South Africa—J.P. LOUW, I.G. HORAK and L.E.O. BRAACK	95–101
Parasites of domestic and wild animals in South Africa. XXXII. Ixodid ticks on scrub hares in the Transvaal—I.G. HORAK, A.M. SPICKETT, L.E.O. BRAACK and B.L. PENZHORN	163–174
Sheep	
The identification of <i>Mycoplasma mycoides mycoides</i> LC as the aetiological agent of balanoposthitis and vulvovaginitis in sheep in South Africa—C.J.V. TRICHARD, P. JORDAAN, L. PROZESKY, ELSIE P. JACOBSZ and MARIJKE M. HENTON	29–37
Spermatozoa	
Ultrastructure of ostrich (<i>Struthio camelus</i>) spermatozoa: I. Transmission electron microscopy—J.T. SOLEY	119–130
<i>Spinitectus</i>	
Parasites of South African freshwater fish. V. Description of two new species of the genus <i>Spinitectus</i> Fourment, 1883 (Nematoda: Cystidicolidae)—J. BOOMKER	139–145
<i>Spirocamallanus spiralis</i>	
Parasites of South African freshwater fish. IV. Description of <i>Spirocamallanus daleneae</i> n. sp. (Nematoda: Camallanidae) from <i>Synodontis zambezensis</i> Peters, 1852 (Mochokidae) with comments on <i>Spirocamallanus spiralis</i> (Baylis, 1923)—J. BOOMKER	131–137
Spot-tailed robber	
Parasites of South African freshwater fish. III. <i>Rhabdochona</i> (<i>Rhabdochona</i>) <i>versterae</i> n. sp. (Nematoda: Rhabdochonidae) from the spot-tailed robber, <i>Alestes imber</i> Peters, 1852—J. BOOMKER and ANNIE J. PETTER	23–27
Spotted hyaena	
[Rabies in wildlife] Social systems and behaviour of the African wild dog <i>Lycaon pictus</i> and the spotted hyaena (<i>Crocuta crocuta</i>) with special reference to rabies—M.G.L. MILLS	405–409
<i>Struthio camelus</i>	
Ultrastructure of ostrich (<i>Struthio camelus</i>) spermatozoa: I. Transmission electron microscopy—J.T. SOLEY	119–130
<i>Synodontis zambezensis</i>	
Parasites of South African freshwater fish. IV. Description of <i>Spirocamallanus daleneae</i> n. sp. (Nematoda: Camallanidae) from <i>Synodontis zambezensis</i> Peters, 1852 (Mochokidae) with comments on <i>Spirocamallanus spiralis</i> (Baylis, 1923)—J. BOOMKER	131–137
Thoracic limb	
Osteology of the thoracic limb of the African elephant (<i>Loxodonta africana</i>)—MALIE M.S. SMUTS and A.J. BEZUIDENHOUT	1–14
Thoracic organs	
The topography of the thoracic and abdominal organs of the Nile crocodile (<i>Crocodylus niloticus</i>)—N.J. VAN DER MERWE and S.H. KOTZE	219–222
Tick	
<i>Rhipicephalus aquatilis</i> sp. nov. (Acari: Ixodidae), a new tick species parasitic mainly on the sitatunga, <i>Tragelaphus spekei</i> , in East and Central Africa—JANE B. WALKER, J.E. KEIRANS and R.G. PEGRAM	205–210
<i>Rhipicephalus exophthalmos</i> sp. nov., a new tick species from southern Africa, and redescription of <i>Rhipicephalus oculatus</i> Neumann, 1901, with which it has hitherto been confused (Acari: Ixodida: Ixodidae)—J.E. KEIRANS, JANE B. WALKER, I.G. HORAK and HELOISE HEYNE	229–246
Transmission electron microscopy	
Ultrastructure of ostrich (<i>Struthio camelus</i>) spermatozoa: I. Transmission electron microscopy—J.T. SOLEY	119–130
Turkeys	
A host-parasite list of the haematozoa of domestic poultry in sub-Saharan Africa and the isolation of <i>Plasmodium durae</i> Herman from turkeys and francolins in South Africa—F.W. HUCHZERMAYER	15–21
Pathogenicity and chemotherapy of <i>Plasmodium durae</i> in experimentally infected domestic turkeys—F.W. HUCHZERMAYER	103–110

Vaccination

- [Development of bait vaccines for the control of canine rabies] Rabies eradication in Belgium by fox vaccination using vaccinia-rabies recombinant virus—B.BROCHIER and P.-P. PASTORET 469–475
- [Development of bait vaccines for the control of canine rabies] Oral rabies vaccination of jackals: progress in Zimbabwe—J. BINGHAM, B.D. PERRY, A.A. KING, C.L. SCHUMACHER, M. AUBERT, A. KAPPELER, C.M. FOGGIN, F.W.G. HILL and A. AUBERT 477–478
- [Development of bait vaccines for the control of canine rabies] Bait formulation and distribution for oral rabies vaccination of domestic dogs: an overview—S.B. LINHART 479–490

Vaccine

- [Development of bait vaccines for the control of canine rabies] Canine rabies—M. FEKADU 421–427
- [Development of bait vaccines for the control of canine rabies] Dog ecology in eastern and southern Africa: implications for rabies control—B.D. PERRY 429–436
- [Development of bait vaccines for the control of canine rabies] A dog ecology study in an urban and a semi-rural area of Zambia—K.K.I.M. DE BALOGH, A.I. WANDELER and F.-X. MESLIN 437–443
- [Development of bait vaccines for the control of canine rabies] Features of dog ecology relevant to rabies spread in Machakos District, Kenya—P.M. KITALA, J.J. MCDERMOTT, M.N. KYULE and J.M. CATHUMA 445–449
- [Development of bait vaccines for the control of canine rabies] The delivery of oral rabies vaccines to dogs: an African perspective—B.D. PERRY and A.I. WANDELER 451–457
- [Development of bait vaccines for the control of canine rabies] SAG-2 oral rabies vaccine—C.L. SCHUMACHER, P. COULON, F. LAFAY, J. BÉNÉJEAN, M.F.A. AUBERT, J. BARRAT, A. AUBERT and A. FLAMAND 459–462
- [Development of bait vaccines for the control of canine rabies] Recombinant rabies vaccines: efficacy assessment in free ranging animals—C.E. RUPPRECHT, C.A. HANLON, N. NIEZGODA, J.R. BUCHANAN, D. DIEHL and H. KOPROWSKI 463–468
- [Development of bait vaccines for the control of canine rabies] Rabies eradication in Belgium by fox vaccination using vaccinia-rabies recombinant virus—B. BROCHIER and P.-P. PASTORET 469–475
- [Development of bait vaccines for the control of canine rabies] Oral rabies vaccination of jackals: progress in Zimbabwe—J. BINGHAM, B.D. PERRY, A.A. KING, C.L. SCHUMACHER, M. AUBERT, A. KAPPELER, C.M. FOGGIN, F.W.G. HILL and A. AUBERT 477–478
- [Development of bait vaccines for the control of canine rabies] Bait formulation and distribution for oral rabies vaccination of domestic dogs: an overview—S.B. LINHART 479–490

Virus

- Detection of bluetongue virus RNA in cell cultures and in the central nervous system of experimentally infected mice using *in situ* hybridization—ESTELLE H. VENTER, J.J. VAN DER LUGT and G.H. GERDES 39–45
- Rhipicephalus zambeziensis* unlikely to transmit foot-and-mouth disease virus—C. DE W.J. VAN VUUREN, E. BLOUIN, F.T. POTGIETER and G.R. THOMSON 75–77
- Generation of a nucleic acid probe specific for the alcelaphine herpesvirus I and its use for the detection of malignant catarrhal fever virus DNA in blue wildebeest calves (*Connochaetes taurinus*)—ANITA L. MICHEL 87–93
- Circulation of African horsesickness virus in zebra (*Equus burchelli*) in the Kruger National Park, South Africa, as measured by the prevalence of type specific antibodies—B.J.H. BARNARD 111–117
- Serological evidence of equine arteritis virus in donkeys in South Africa—J.T. PAWESKA and B.J.H. BARNARD 155–158
- [The molecular epidemiology of African Lyssaviruses] The rabies virus genome: an overview—N. TORDO and A. KOUKNETZOFF 263–269
- [The molecular epidemiology of African Lyssaviruses] Rabies virus antigenicity: an overview—P. COULON, F. LAFAY and A. FLAMAND 271–275
- [The molecular epidemiology of African Lyssaviruses] Taxonomy and evolutionary studies on Lyssaviruses with special reference to Africa—H. BOURHY, B. KISSI and N. TORDO 277–282
- [The molecular epidemiology of African Lyssaviruses] Monoclonal antibody studies on rabies-related viruses—A.A. KING 283–287
