

# **Overview of the UNISA Open Access Institutional Repository**

Presented to members of the UNISA Community  
19 March 2008

Presented by Ina Smith

# Research @ UNISA

---

“Be a **leading research institution** in South Africa”

“**Long term investment** in the creation of new and improved knowledge and insights”

“Unisa’s research policy is based on the principle of **academic freedom** – it encourages **free and open intellectual inquiry** and is a prerequisite for academic excellence”

## **Objectives:**

“**Enhance scholarly stature** of the University”

“Combination of research and community service is important” –  
**transfer research to community**

“**Disseminate research findings** [in many forms e.g. reports, books, articles, media] – so that they may be confirmed, evaluated, applied by others

– UNISA Research Policy [www.unisa.ac.za](http://www.unisa.ac.za)

# Open access

---

## Two currents in OA movement:

- OA **self-archiving in institutional repositories** (“green” road to OA)
- OA publishing (“gold” road to OA – see e.g. DOAJ)

“**Open access** (OA) is **free, immediate, permanent, full-text, online** access, for any user, web-wide, to digital scientific research and scholarly material.”

Source: [http://en.wikipedia.org/wiki/Open\\_access](http://en.wikipedia.org/wiki/Open_access)

# What is an IR?

---

- Set of services
- Management
- Dissemination
- Organizational commitment
- Stewardship
- Long-term preservation
- Organization & access/ distribution

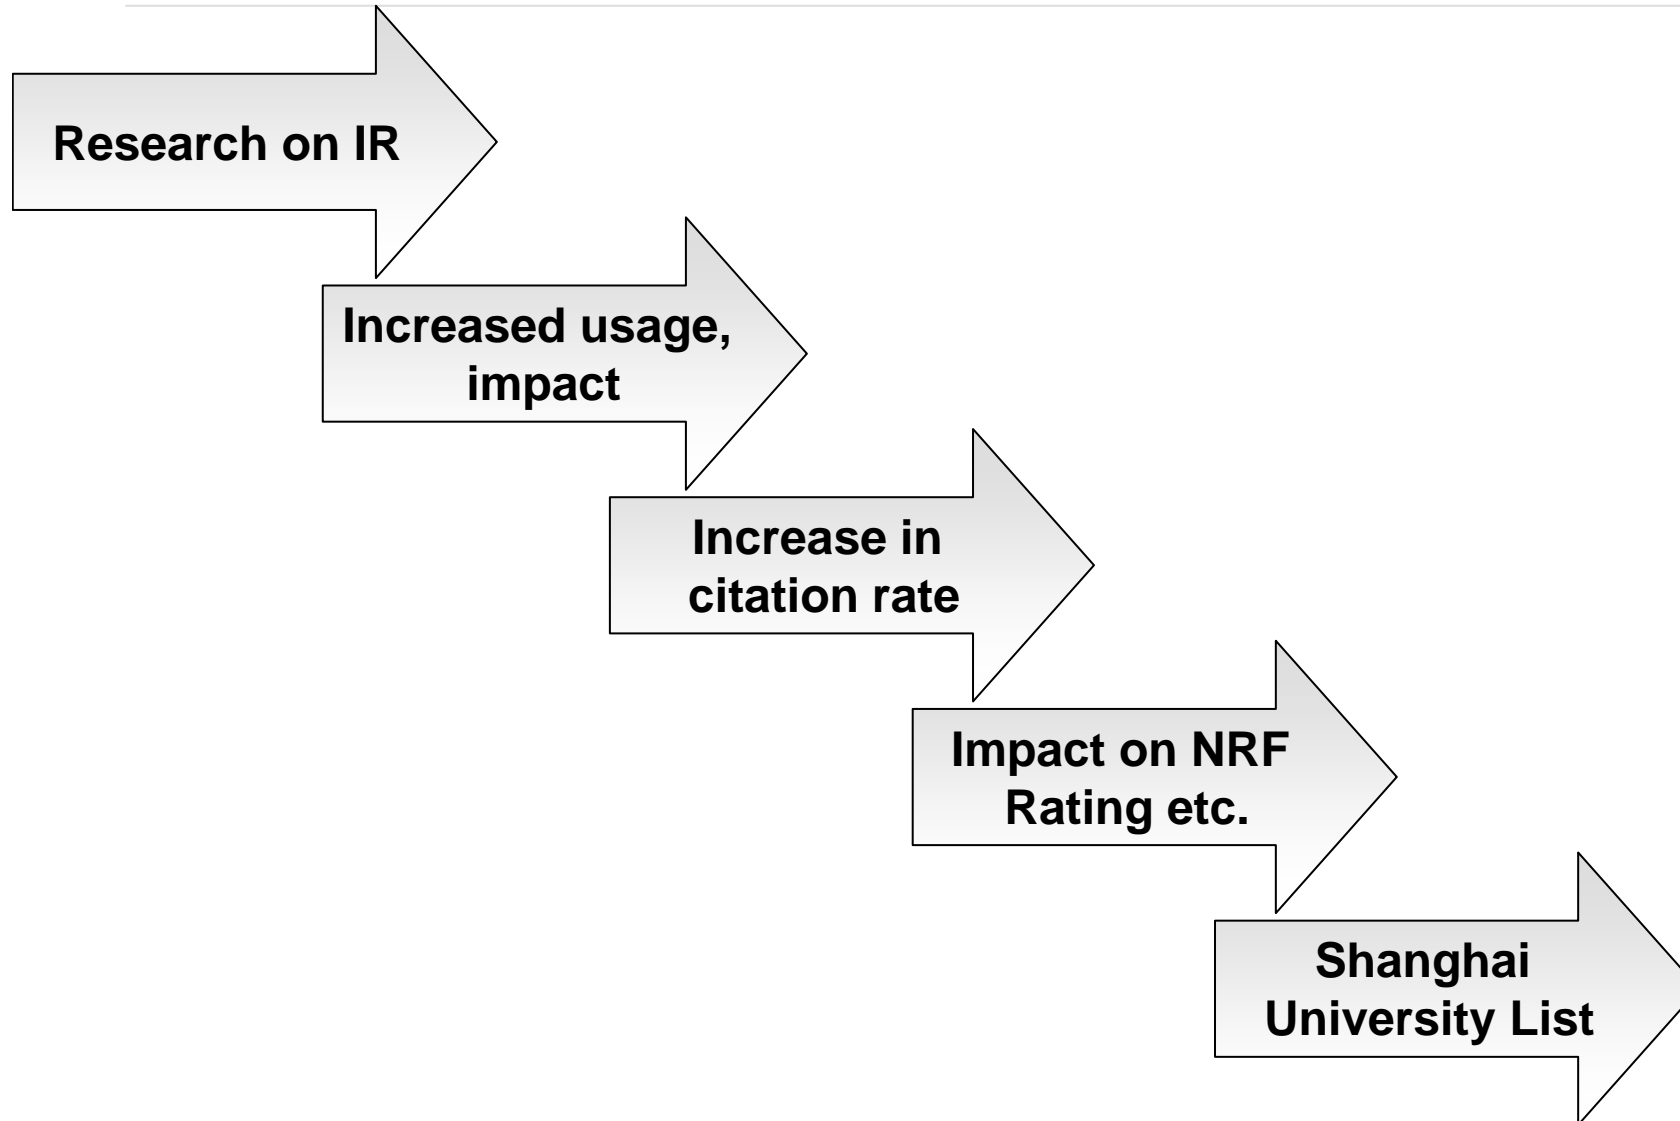

# Benefits of an open access IR

---

- Research out quickly, worldwide
- Increases visibility, usage, impact of research  
“open access papers are **read more widely**, and, therefore, **cited more frequently**. The consequence of this is that they have **greater impact**” (Jones, Andrew and MacColl 2006)
- Open access to all – also those who cannot afford subscribing
- Central archive of research
- Persistent URL
- Preservation function

# Impact an IR can have on research

---

# Implementing your IR (Timeline)

# UNISA Research Repository

The screenshot shows a Microsoft Internet Explorer browser window displaying the DSpace at UNISA website. The browser's address bar shows the URL <http://163.200.219.67:8080/dspace/>. The website header features the DSpace logo and a link to "About DSpace Software". A red-bordered box highlights the URL in the address bar. The main content area is titled "DSpace at UNISA >" and contains a welcome message: "UNISA DSpace is Live! Welcome to the UNISA open access digital research repository! All participants for this evaluation phase are requested to please register at [My DSpace](#). This will enable the IR Manager to assign certain rights to you. Thank you for participating in this evaluation! Evaluation: 10 - 21 March 2008 Evaluation Instrument to be added soon. Inquiries: [UNISA IR Manager](#) Tel.: 012 429 3426". Below this is a search section with the text "Enter some text in the box below to search DSpace." and a search input field with a "Go" button. The footer section is titled "Communities in DSpace" and includes the text "Choose a community to browse its collections." and a link to "DSpace". The left sidebar contains navigation links: "Search DSpace" with a search box and "Go" button, "Advanced Search", "Home", "Browse" with sub-links for "Communities & Collections", "Titles", "Authors", "Subjects", and "By Date", "Sign on to:" with links for "Receive email updates", "My DSpace authorized users", "Edit Profile", and "Help". The right sidebar features the UNISA logo and the text "UNISA university of south africa" followed by an "About" section with the text "Welcome to The University of South Africa Institutional Repository".

# About DSpace

---

## Top Reasons to Use DSpace

Largest community of users and developers worldwide [more](#)

Free open source software [more](#)

Completely customizable to fit your needs [more](#)

Can manage and preserve all types of digital content  
-- text, images, moving images, mpegs, datasets [more](#)

Used by educational, government, private and  
commercial institutions [more](#)

Can be installed easily "out of the box" [more](#)

<http://www.dspace.org/>

# Features offered by DSpace

---

- Web/ Library 2.0 functionalities
- Guarantees archiving/ preservation of material in digital format
- Persistent URL's
- Subscribe to collections
- E-workflow for quality control
- Distributed/ Decentralised input
- Limit access on various levels
- Searchable (incl. full text) – not static web page

# 10 Repositories National

The screenshot shows the homepage of the Stellenbosch University Institutional Repository. The browser window title is "Stellenbosch University Institutional Repository: Home - Microsoft Internet Explorer". The address bar shows the URL "http://ir.sun.ac.za/dspace/". The page features the university's logo and name, "UNIVERSITEIT STELLENBOSCH-UNIVERSITY", with the tagline "jou kennisvenoot-your knowledge partner".

The main content area is titled "Stellenbosch University Institutional Repository" and contains the following text:

The institutional repository at Stellenbosch University is used to collect, preserve and disseminate electronic theses and dissertations as well as Library and departmental special collections.

For more information on submitting your work into the repository, please contact the Library and Information Services department.

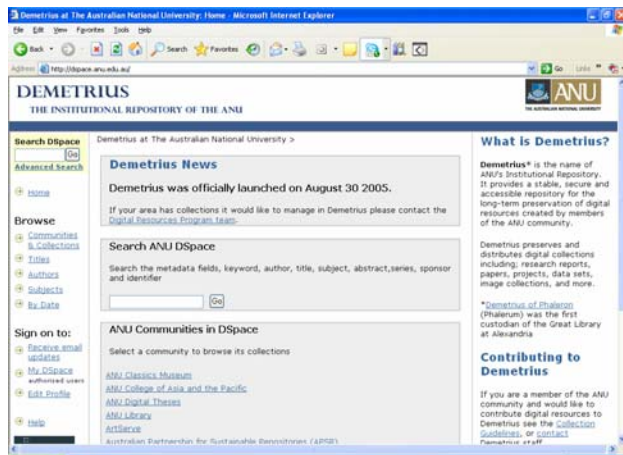

The page includes a search box with a "Go" button and a "Search" section with a text input field and a "Go" button. Below the search section, there is a "Communities in DSpace" section with the text "Choose a community to browse its collections." and two links: "Electronic Theses and Dissertations" and "Special Collections".

The left sidebar contains navigation links:

- Search DSpace:  Go, [Advanced Search](#)

**THE ROLE OF EXTENSION IN TRADITIONAL AGRICULTURE :  
EVIDENCE FROM THE FARMER SUPPORT PROGRAMME\***

J F Kirsten<sup>2</sup>, J van Zyl<sup>3</sup> and HJ Sartorius von Bach<sup>4</sup>

**ABSTRACT**

This paper evaluates the extension and training element of the FSP as implemented in the farmer support programmes of Venda and Lebowa. The importance and contribution of extension and training in the success of the programme can be judged from this paper. The general conclusion of the paper is that extension and training play an important role in FSPs. They are closely associated with increased production. However, to what extent it contributed towards increased production remains a point of contention. Some analysts and observers argue that only the rural elite has access to FSP related services. Results from the analyses in the paper, however, show that comparable households achieve higher yields when they get appropriate extension. Training and extension thus at least partly contribute to higher maize yields in FSP areas.

**UITTREKSEL**

Hierdie artikel beskou die opleidings en voorligtingskomponent van die kleinboer ondersteuningsprogram ("Farmer Support Programme" - "FSP") soos dit in sekere gebiede van Venda en Lebowa geïmplementeer is. Die belangrikheid en bydrae van voorligting en opleiding in die sukses van hierdie program blyk duidelik uit hierdie artikel. Die gevolgtrekking word gemaak dat voorligting en opleiding een van die belangrikste elemente van hierdie program is en nou geassosieer word met verhoging in produksie. Tot watter mate opleiding en voorligting tot die verhoging in produksie bydra, bly egter 'n punt van dispuut. Ontledings in die artikel toon egter aan dat vergelykbare huishoudings meer produseer indien hulle gepaste voorligting ontvang. Dit wil dus voorkom asof opleiding en voorligting ten minste gedeeltelik bydra tot hoër opbrengste in die gebiede waar die kleinboer ondersteuningsprogramme geïmplementeer is.

**1. INTRODUCTION**

In response to the ineffective and costly large scale project approach in homeland agriculture, the Development Bank of Southern Africa introduced the concept of a small holder farmer support approach to aid the development of black agriculture in South Africa. Considering the various constraints faced by small farmers in the homelands (cf. Van Rooyen *et al*, 1987), the farmer support programme (FSP) was

by improving farmers' access to support services over a broad base in a sequential and evolutionary manner" (Van Rooyen, 1993).

In order to reach this objective the FSP comprises six basic elements, i.e. the supply of inputs and capital to farmers, mechanisation services, marketing services, extension services, training and

## PROTECTION UP TO A POINT

Johann Kirsten

**A recent research study concludes that the impact of a tariff on the price of white bread would be minimal**

The row between wheat farmers and large buyers of grain over an application for a tariff on imported wheat has reopened the debate on whether we need to protect our farmers against foreign competition. Already a heated issue, the row erupted again after GrainSA's application to the International Trade Administration Commission recently.

With the advent of democracy in 1994, SA adopted a liberalised trade policy regime in line with the World Trade Organisation's (WTO) philosophy of freer trade. These free-trade principles were implemented quite rapidly after the 1994 Marrakech agreement.

By 2004 the majority of SA's tariff lines were zero or below 10% ad valorem, reflecting our liberalised trade regime.

Many argue that SA was too quick in freeing trade and failed to take into account the shedding of jobs and other negatives because not all major trading nations followed similar reform schedules. As a result, today SA has one of the most open economies in the world.

In the WTO the battle for free trade in agricultural commodity markets has not been won, and high levels of agricultural subsidies and protection remain in the European Union and the US. This creates an uneven playing field, which is the main reason why SA farmers say they should be protected.

Various studies argue that the removal of trade-distorting agricultural policies of developed countries would entail higher world agricultural commodity prices. For example, the world wheat price would increase by 14% if global export subsidies and domestic support were removed and import tariffs reduced.

ment, through the land reform programme, is trying to establish a group of farmers which does not have much experience in agriculture or world agricultural markets. It could, therefore, well be asked whether it is fair to expose these emerging (black) farmers to this unfair playing field. Why should they not enjoy some form of protection against these world forces as they try to get their farming enterprises up and running? White commercial farmers had this protection for years and though it protected inefficiencies, it at least provided a cushion to start competing effectively.

In terms of WTO rules SA's tariff-bound rates are much higher than our current tariff levels, leaving substantial room for tariff increases without compromising WTO commitments.

It is important to note the welfare effects of tariff protection: producers enjoy high price guarantees but consumers are worse off since they have to pay more for the product. With high poverty levels in SA, this would be a major concern. It has to be weighed against potential job losses and farm bankruptcies.

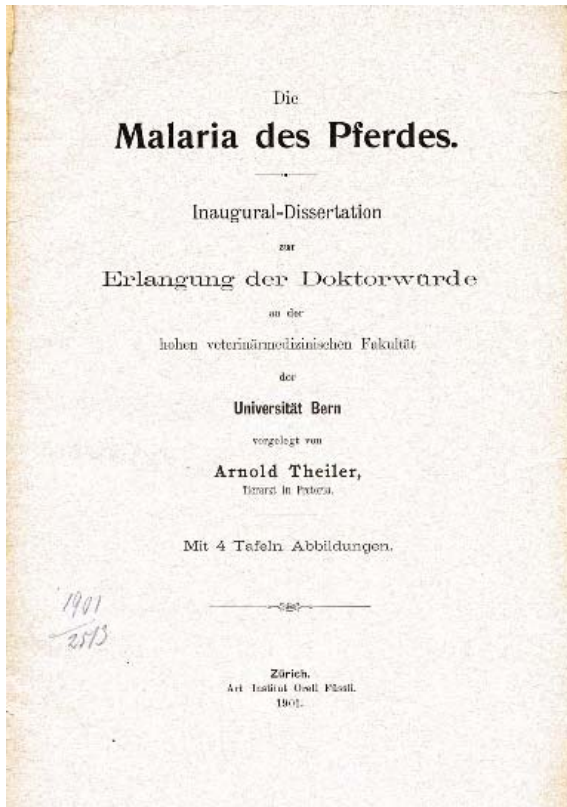

But if we depart from the standpoint that tariffs do have an impact on the domestic price of imported commodities, the critical question to answer is: what is the real impact of this increase on consumer prices? In a recent study conducted by the University of Pretoria's Bureau for Food & Agricultural Policy Research, it was found that an increase in the wheat import tariff from the current level of 2% of the world price of wheat to 30% would increase the domestic wheat price by R137/t. Linking this increase to a price transmission model showed an increase in the cost of flour of 8c/loaf, which would result

## Purpose

In alignment and discussion with national research policy directives and in vigorous pursuance of the goal of compliance with international research best practices and bench-marks, the Research Directorate endeavours to develop, facilitate, manage and monitor quality research structures, policies and processes. Such structures and processes will in turn be used to support, nurture and increase research capacity and quality.

## Functions

- Develop and facilitate the implementation of research strategy
- Establish, manage and facilitate research processes and activities
- Develop and facilitate research capacity building
- Liaise and collaborate with internal and external stakeholders
- Monitor and analyse research data, developments and trends

# Google Scholar

The screenshot shows a Microsoft Internet Explorer browser window. The address bar displays the URL: <https://www.up.ac.za/dspace/handle/2263/931>. The browser window is split into two panes. The left pane shows Google Scholar search results for the query "The right to health in the global economy: reading human rights obligations into the patent regime of the WTO-TRIPS Agreement". The top result is a dissertation by M. UPSpace (2001) titled "The Right to Health in the Global Economy: Reading Human Rights Obligations into the Patent Regime of the WTO-TRIPS Agreement". The right pane shows the UP Space item page for the same document. The page includes a search bar, navigation links, and a metadata section. A green arrow points from the search results to the item page.

# Upspace

From Wikipedia, the free encyclopedia

**UPSspace** (Institutional research repository of the [University of Pretoria](#)) is the name of the open access digital [institutional repository](#) of the [University of Pretoria, South Africa](#). A digital institutional repository in the context of a higher education institution can be defined as "a set of services that a university offers to the members of its community for the management and dissemination of digital materials created by the institution and its community members. It is most essentially an organizational commitment to the stewardship of these digital materials, including long-term preservation where appropriate, as well as organization and access or distribution."<sup>[1]</sup> UPSpace contains a collection of the intellectual/ research output produced by past and current researchers of the University of Pretoria. The spectrum of material covered in UPSpace includes the following:

Historical/ archival material - after it has been digitized; Research articles (scholarly publications); Popular research material; Unpublished research; Inaugural addresses; Conference proceedings; Technical reports; Open lectures, and many more.

The main objectives of an institutional repository are: 1) to enhance the visibility of the knowledge products created by an institution's members by providing easy open access, and 2) to preserve the intellectual output of the members of that community for years to come.

The open source platform, [DSpace](#), which was developed by an MIT-Hewlett Packard alliance, is used for UPSpace.

## To conclude ...

“This project has transformed my life as a Dean in three ways.

First, it made me aware of the **power of technology** in managing the multiplicity of written tasks—media articles, media interviews, newspaper columns, intellectual pieces—that simply drift into spaces where I can never find these original writings.

Second, it made me aware of the **efficiency of dissemination** of ideas in this information age if one simply took the time to create such a web space.

Third, it made me aware of the **power of collaboration between** academic authors and the academic information services (library)—something that I had not explored until now. I am deeply grateful to the persistence of my academic library colleagues in opening up this new world in the life of a busy Dean” –

**Prof. Jonathan Jansen**, former Dean of the Faculty of Education, University of Pretoria, Personal E-mail Communication, May 08, 2006.
