vision
A vibrant sub-center that supports the potential for all people to develop adequate housing and business opportunities, regardless of their income levels.

strategy
Transform the main street of Ayigga into a Corridor that will stimulate community development by providing a new framework of infrastructure, public services, transport, risk, open spaces that is supportive of new housing and business development.

- Improve the central road from the Accra-Kumasi highway to the train station
- Increase the number of building units for the low and middle income earners, with the building movement still taking into account the radiation and landscape planning
- Increase the number of households that have access to infrastructure (i.e., electricity, water, and sanitation)
- Reduce water consumption with the use of water management to reduce erosion
- Increase the amount of public green space
- Improve the mix of income within the community
