List of Figures

Figure 1: Discovering the site.	xii
Figure 2: Discovering the site. The condition between JAG and Joubert Park.	6
Figure 2.1: Aerial picture indicating location of Joubert Park relative to other known precincts in Johannesburg.	9
Figure 2.2: One of the entry points into the park through historic gates. This entrance is situated on the north of the park and was originally the main entrance of the park, facing JAG.	10
Figure 2.3: The current day promenade leading from the gates in figure 2.2.	10
Figure 2.4: Walking with our guide from the Community Patrol.	10
Figure 2.5: The chess culture.	10
Figure 2.6: Currently not operational, one of the fountains in the park has become a collector of waste.	10
Figure 2.7: Large chess boards. The surrounding wall separates the park and the Greenhouse Project located in the north-western part of the park.	10
Figure 2.8: People in the park on a weekend.	13
Figure 2.9: People playing chess under the trees.	13
Figure 2.10: A dash of colour.	13
Figure 2.11: Resting, walking and socialising.	13
Figure 2.12: The BRT station forming a barrier at the eastern entrance.	14
Figure 2.13: Gathering protesters.	14
Figure 2.14: Waiting for the protest to begin with JAG as a backdrop.	14
Figure 2.15: Looking south on King George Street.	16
Figure 2.16: Barriers between the park and the street.	16
Figure 2.17: Roasting nuts.	16
Figure 2.18: Vendors.	16
Figure 2.19: Entrance to Joubert Park.	16
Figure 2.20: The playground as seen from the street.	16
Figure 2.21: One of the photographers sitting on the low brick walls which frame the gates.	18
Figure 2.22: Calvin Mazibuko had worked in the park for 7 years in 2011. (Roane, 2011)	18
Figure 2.23: Varrie Hluzani waiting for customers. Varrie has been working in the park since 1993 (Roane, 2011)	18
Figure 2.24: One of the photographers reflecting on his past work (Roane, 2011)	18
Figure 2.25: Joubert Park as taken from the roof of JAG - approximately taken in 1920. (JAG Archives)	20
Figure 2.26: The green park before the formal layout.	22
Figure 2.27: The promenade.	22
Figure 2.28: People congregating at the bandstand for a weekend performance.	22
Figure 2.29: The bandstand with surrounding benches on a normal park day.	22
Figure 2.30: The original conservatory building housing exotic plants.	22
Figure 2.31: The original central fountain built in 1895.	22
Figure 2.32: Old city map of Johannesburg central (JAGA n.d.)	23
Figure 2.33: The original design for Joubert Park by Edward Lutyens - pre-1915 (JAGA N.d.)	25
Figure 2.34: Aerial photograph - taken pre-1940 (JAGA N.d.)	25
Figure 2.35: Aerial photograph of Joubert Park - pre-1987 (JAGA N.d.)	25
Figure 3: Photograph of the southern (and original) entrance of the gallery - taken between 1930-1950 (JAGA, N.d.)	26

Figure 3.1: Photo of the southern entrance of the gallery - taken approximately between 1918 - 1930 (JAG Archive N.d.)	28
Figure 3.2: Entrance doors into the first gallery space - original Lutyens entrance that is still used today	28
Figure 3.3: Gerard Sekoto's <i>Yellow Houses, A street in Sophiatown</i> (1940).	30
Figure 3.4: Penny Siopis' oil painting named <i>Melancholia</i> (1986).	30
Figure 3.5: Exhibition of JAG's Foundation collection, curated by Hugh Lane (the first curator of JAG). (Ceruti 2014)	30
Figure 3.6: <i>Aphrodisiac Telephone</i> by Salvador Dali (1936).	31
Figure 3.7: Francisco Goya and Diane Victor prints from the JAG collection (Friends of JAG 2016).	31
Figure 3.8: <i>Due Ballerine</i> by Edgar Degas (1989).	31
Figure 3.9: Drawing of <i>Tete d'arequin</i> by Pablo Picasso (1970).	31
Figure 3.10: Series of images depicting the entry in JAG from the street.	32
Figure 3.11: First exhibition hall designed by Edward Lutyens.	34
Figure 3.12: Diagrams indicating progression of the JAG building. All figures are adapted from Aphane Wiew Architects and Designers' <i>Conservation Management Plan for Johannesburg Art Gallery, City of Joburg</i> (2013)	36
Figure 3.13: First main exhibition space with arched doors and shutters and vaulted ceiling.	38
Figure 3.14: Walk-through exhibition space.	38
Figure 3.15: Wall in courtyard represents the joining of the old and the new Meyer Pienaar addition	38
Figure 3.16: Arched doorways in courtyard as part of Lutyens design.	38
Figure 3.17: Central courtyard space, framed by the Lutyens building on the south and the Meyer Pienaar extension on the north.	38
Figure 3.18: Meyer Pienaar's reinvention of the arch, forming the northern wall of the courtyard.	38
Figure 3.19: Main walkway in basement with lights made to look like light shafts.	40
Figure 3.20: Outdoor "fountain" space- currently unused and inaccessible to public.	40
Figure 3.21: Outdoor "fountain" space, now left derelict. Forms a barrier with the park.	40
Figure 3.22: Main exhibition space in the basement.	40
Figure 3.23: Ramps leading onto entrance platform alongside relentless and dead roofs and retaining wall.	42
Figure 3.24: View of roofs from upper floor of JAG.	42
Figure 3.25: Exhibition wing from the Lutyens' 1940 extension now closed off to the public and used as storage.	45
Figure 3.26: Due to on-going water problems the wings are left unused	45
Figure 3.27: Destroyed wall paneling.	45
Figure 3.28: Floor in exhibition space has lifted.	45
Figure 3.29: The southern entrance door is closed to the park.	45
Figure 3.30: Majority of the basement extension is used as storage space.	45
Figure 3.31: Image showing the <i>quietness</i> of JAG's spaces.	46
Figure 3.32: Photo depicting the vibrancy of the park..	46
Figure 4: Palisade fence that segregates the gallery and the park.	48
Figure 4.1: Unused carved out void in the ground creates a barrier between JAG and the park.	50
Figure 4.2: The frequent police presence creates an unwelcoming air.	50
Figure 4.3: The palisade fence.	50
Figure 4.4: A fence disconnects the park and the gallery along the length of the site.	50
Figure 4.5: Fence over fence layering	50
Figure 4.6: Sketch indicating the northern facade of JAG and the associated physical and visual barriers.	52
Figure 4.7: Sketch of first floor plan and surrounding barriers of JAG.	52
Figure 4.8: Series of photographs indicating the southern barriers between the gallery entrance and the rest of the city.	54
Figure 4.9: Diagram of physical barriers around Joubert Park.	56
Figure 4.10: Diagram of proposed strategies to re-establish Joubert Park.	56
Figure 4.11: Functions as found in the park today (Bennet 2013)	59
Figure 4.12: Current stakeholders of the park. (Base drawing from JAG Archive N.d.)	59
Figure 4.13: Series of diagrams illustrating the basic evolution of Johannesburg. (JPJ 2016)	61
Figure 4.14: Series of diagrams illustrating the JAG's division of the park's lifetime into various identities.	63

Figure 4.15: Series of diagrams illustrating the spatial progression of Joubert Park.	65
Figure 4.16: Diagram of physical barriers around Joubert Park.	66
Figure 4.17: Diagram of proposed strategies to re-establish Joubert Park.	66
Figure 5: Extending the park into the city fabric.	68
Figure 5.1: Conceptual diagrams of the park and JAG as a cultural center bleeding into the city.	70
Figure 5.2: Situating Joubert Park within other cultural precincts in Johannesburg.	72
Figure 5.3: <i>The Seam Project</i> by NLA Architects was the winning entry in an urban regeneration initiative by the City of Johannesburg (a collaboration of the JDA, Joburg City Parks and the Department of Planning and Urban Management). The project focuses on <i>stitching together</i> the open spaces in the city, reclaiming them to create a green public space that runs, uninterrupted, through the city centre (Barnard & Young N.d). Original diagram by NLA N.d.	74
Figure 5.4: Diagrams of various parks in Johannesburg with the JPG's understanding of their identity and relation to the city as well as surrounding functions. (JPG 2016)	75
Figure 5.5: Diagrams showing existing threats, weaknesses opportunities and strengths at Joubert Park. (JPG 2016)	75
Figure 5.6: Changes proposed in Joubert Park Precinct. (JPG 2016)	76
Figure 5.7: Precinct vision by the Joubert Park Group (2016)	79
Figure 6: An example of a portrait created with wet plate photography.	80
Figure 6.1: Collage of Joubert Oark precinct (Adapted from images from JAG Archives N.d.)	82
Figure 6.2: Rethink. (Trinkhaus, 2009)	84
Figure 6.3: "Leaves of Grass" by Geoffery Farmer. (Orlowski 2012)	86
Figure 6.4: JAG's exhibition of African crafts, the largest collection in the world of its kind.	88
Figure 7: The brain (Brodell 2014)	90
Figure 7.1: St Peter's Basilica in the Vatican being lit up with images of endangered animals as part of the exhibition titled "Fiat Lux: Illuminating our Common Home" (Stefano Rellandini 2015)	94
Figure 7.2: Capturing.	94
Figure 7.3: Dedicated storage area for paintings. (Katoen Natie N.d.)	96
Figure 7.4: Memory (Safi 2015)	97
Figure 7.6: Conceptual model of points of potential intervention.	98
Figure 7.5: Diagram of potential points of memory phases in Joubert Park. (Adapted from original by Bennet 2013)	98
Figure 8: Double exposure (Demir 2014)	100
Figure 8.1: Model of JAG indicating external mass and internal floor plan. Diagram indicated positions for proposal strategies.	103
Figure 8.3: Photographs of Floyd Mashego teaching aerobics at the Union Buildings. (Losi 2015)	104
Figure 8.2: Photograph of outdoor concert at the Nirox Sculpture Garden.	104
Figure 8.4: Images of sculptures seen at the Nirox Sculpture Garden.	107
Figure 8.5: Image of a projection pod in the landscape. (Architect and date unknown.)	107
Figure 8.6: Images of Herzog & de Meuron and Ai Weiwei's serpentine pavilion. (Baan Iwan 2012)	108
Figure 8.7: Concept sketch of interventions on site.	111
Figure 8.8: Mapping of existing energy on site.	111
Figure 8.9: Points of interest along main axis of site.	111
Figure 8.10: Concept diagram of nodes of memory along the main historic axis of the site.	115
Figure 8.11: Series of sketches indicating portions of site investigated throughout the year.	117
Figure 8.12: Series of models indicating portions of site investigated throughout the year.	119
Figure 8.13: Conceptual section through park with various proposed functions indicated	121
Figure 9: Chinese photographic archive (Wang 2004)	122
Figure 9.1: <i>Crossroads</i> by Jak Baruh (O'Brien 2016) An image of the layering of time in a city depicting transience at a crossroads in Rome.	125
Figure 9.2: <i>East Village</i> by Justin Borucki (Geffin, 2014) An example of wet-plate photography representing a shorter exposure time for a clearer image	126
Figure 9.3: Example of an old pin hole camera (Falco 2012)	126
Figure 9.4: <i>Photo Vases</i> by ShiKai Tseng (Tseng 2011) An example of ceramic vases coated in light-sensitive layer and exposed to light through the use of a pin hole box with multiple holes.	128
Figure 9.5: <i>Photo Vases</i> by ShiKai Tseng (Tseng 2011) Vases shows with their corresponding pin-hole cameras.	128
Figure 9.6: Ian Ruther in his truck (Silver and Light 2015)	130

Figure 9.7: The larger than life camera (Silver and Light 2015)	130
Figure 9.8: An example of an image using glass as a substrate (Silver and Light 2015)	130
Figure 9.9: Salt print (Da Silva N.d.)	131
Figure 9.10: Cyanotype print (Unknown N.d)	131
Figure 9.11: Van Dyke Brown print (Da Silva N.d.)	131
Figure 9.12: Platinum Palladium print (Boshoff, n.d)	131
Figure 9.13: Lith print (Boshoff, n.d)	131
Figure 9.14: A portrait by Janus Boshoff using glass. Images indicating the negative and positive of the image based on the background colour.	132
Figure 9.15: The studio with Janus Boshoff at Alternative Print Workshop.	132
Figure 10: 1952 portable wetplate camera (Wetplate Supplies, 2015)	134
Figure 10.1: Expose, Record, Reflect	137
Figure 11: Projection. (Author and date unknown)	140
Figure 11.1: Conceptual sketches for pavilion form.	143
Figure 11.2: Series of conceptual images for <i>framing the archive</i> .	145
Figure 11.3: Series of conceptual sketches for <i>solid and void</i> .	146
Figure 11.4: Series of images supporting the conceptual approach for <i>floating on steel pins</i> .	148
Figure 11.5: Series of sketches indicating the initial sectional exploration for the design.	151
Figure 11.6: Series of conceptual images for	153
Figure 11.7: Series of conceptual models. (Author, 2016)	154
Figure 11.8: Series of sketches of elevated pavilion plane.	156
Figure 11.9: Iteration 3 - filling the void	164
Figure 11.10: Iteration 4 - Loosening the solids	164
Figure 11.11: Ground floor plan iteration 5 - extending the permanent	166
Figure 11.12: Ground floor plan while pavilion is on site.	168
Figure 11.13: Ground floor plan without pavilion structure.	168
Figure 11.14: Iteration 1 - Follow the grid	170
Figure 11.15: Iteration 2 - Communal/social wash-up	170
Figure 11.16: Iteration 3 - Sculptural elements	170
Figure 11.17: Iteration 4 - Respecting the permanent structures	170
Figure 11.18: Iteration 5 - Rearranging	170
Figure 11.19: Iteration 6 - Communal area against concrete wall	170
Figure 11.20: Iteration 1 - Sculptural element.	172
Figure 11.21: Iteration 2 - Direct access.	172
Figure 11.22: Iteration 3 - Framing views.	172
Figure 11.23: Iteration 3 - Simplification.	172
Figure 11.24: Iteration 5 - Merging strategies.	172
Figure 11.25: Iteration 5 places on the ground floor plan.	172
Figure 12: Texture as design informant.	176
Figure 12.1: sequence of sketches indicating phases of construction and deconstruction of the pavilion	181
Figure 12.2: sequence of sketches indicating tectonic concept of pavilion	181
Figure 12.3: First construction iterations explored on section.	182
Figure 12.4: Tectonic concept sketch (Author, 2016)	184
Figure 12.5: Completed Co-Space blimp. (Raw Studios, 2015)	186
Figure 12.6: Diagram of assembly.	186
Figure 12.7: Range of images showing the assembly of the Raw Studios Co-Space pod - example of premanufactured elements, erected on site at Boukunde, University of Pretoria. (Swart, 2015)	186
Figure 12.8: Model cut into 2,5m intervals.	189
Figure 12.9: Images depicting the <i>slicing</i> of the form to create ribs.	189

Figure 12.10: Images of 1-100 concept model.	189
Figure 12.11: Concept sketch of roof plan of building indicating water storage facilities.	191
Figure 12.12: Graph indicating the total water demand (Pieterse, 2014)	191
Figure 12.13: Graph indicating the total water yield (Ibid.) Tables indicating the rain water harvesting capacity, water yield and water budget for both the initiation phase and the first year of operation (Ibid.)	191
Figure 12.14: 1-20 section - iteration 2 (Author, 2016)	196
Figure 12.15: Example of steel and timber corner connection (Glenfort, 2014)	196
Figure 12.16: 1-20 section - iteration 1 Opposite page:	198
Figure 12.17: Sketch of adjustable column concept (Author, 2016)	198
Figure 12.18: Images from Tiger Brand for adjustable steel columns (Tiger Brands, n.d.)	198
Figure 12.19: Detail of adjustable column	200
Figure 12.20: Exploded diagram showing assembly of column.	200
Figure 12.21: Image of complete column.	200
Figure 12.22: Concept sketch showing columns extending into ground and into pavilion above.	200
Figure 12.23: Second World War ruin (Goosey, 2011)	204
Figure 12.24: Images indicating materials to be used in the design of the ground floor plane	206
Figure 12.25: Close up of facade panels. (Axis Facades, 2012)	208
Figure 12.26: In Memoriam: American Folk Art Museum (Careaga, n.d)	208
Figure 12.27: In Memoriam: American Folk Art Museum (Careaga, n.d)	208
Figure 12.28: Materials investigated including cor-ten, copper, cross-laminated timber, structural timber and steel.	211
Figure 12.29: Existing materials palette as found on site.	211
Figure 12.30: Series of copper cladding variations.	212
Figure 12.31: Exploration of texturing copper panels.	212
Figure 12.32: Series of sketches indicating the progression of the fixing designs.	214
Figure 12.33: A series of images depicting the connection between sandwich panels and ribs using mils steel angles.	216
Figure 12.34: Opposite page:	218
Figure 12.35: A series of sketches exploring external fixing methods for panels made from cross-laminated timber.	218
Figure 12.36: Current page:	218
Figure 12.37: Diagrams showing two iterations of the composition of cladding panels.	218
Figure 12.38: Photographs of first construction model (scale 1:50)	220
Figure 12.39: Sequence of assembly	222
Figure 12.40: Photographs of detail model	227
Figure 12.41: Building in context.	228
Figure 12.42: Ground floor plan.	228
Figure 12.43: Ground floor plan.	230
Figure 12.44: Interior renders depicting the haptic qualities of the enclosed spaces	232
Figure 12.45: South elevation	236
Figure 12.46: North elevation	238
Figure 12.47: Renders of a view from the street.	240
Figure 13: Section sketch (Author, 2016)	248
Figure 13.1: Photographs of final design model	250
Figure 13.2: Photographs of final presentation	252
Figure 13.3: Hand print in weathered concrete. (Colourbox, N.d.)	254
Figure 13.4: <i>Two eyes are better than one.</i> (Photo Conbrio 2015)	258
