

SUBJECT INDEX, Vol. 7, Nos. 1 and 2.

	VOL	PAGE
Anatomical Studies.		
No. 61. A comparison of two of the so-called zebus	VII	371
Anthelmintic.		
Anthelmintic tests, chiefly with tetrachlorethylene, for the removal of the hookworm, <i>Gaigeria pachyscelis</i> , from infested sheep, with observation on the effects of this drug on other parasitic nematodes	VII	399
Aves.		
A synoptic check-list and host-list of the ectoparasites found on South African Mammalia, Aves and Reptilia. (Supplement No. 1.)	VII	69
Bacterial.		
The isolation of single bacterial cells	VII	133
Bile.		
Studies on the photosensitisation of animals in South Africa IX. The bile flow of the merino sheep under various conditions	VII	349
Blowfly Dressing.		
A new fly repellent and a blowfly dressing (Preliminary Report)	VII	419
Chemical Studies.		
Some cases of congenital porphyrinuria in cattle; chemical studies upon the living animals and post-mortem material	VII	567
Cl. Chauvoei.		
The production of immunity to <i>Cl. chauvoei</i>	VII	143
The toxin of <i>Cl. chauvoei</i>	VII	433
Diptera pupipara.		
Description of a new species of Hippobosca. <i>Diptera pupipara</i>	VII	67
Ectoparasites.		
A synoptic check-list and host-list of the ectoparasites found on South African mammalia, aves and reptilia (Supplement No. 1)	VII	69
Fly Repellent.		
A new fly repellent and a blowfly dressing (Preliminary Report)	VII	419

	VOL.	PAGE
Foetus.		
Studies in sex physiology No. 14. The situation of the developing foetus in the uterus of the live merino sheep	VII	227
Studies in sex physiology No. 15. Further observations on the body weight and crown-rump length of merino foetuses	VII	239
Studies in sex physiology No. 16. Surface area in the foetus of the merino sheep	VII	251
Studies in sex physiology No. 17. The extent of the gravid merino uterus in relation to the vertebral column in the dorsal recumbent position and the weights of the gravid uterus and foetus in relation to the general body weight	VII	261
Gaigeria pachyscelis.		
Anthelmintic tests chiefly with tetrachlorethylene for the removal of the hookworm, <i>Gaigeria pachyscelis</i> , from infested sheep, with observations on the effects of this drug on other parasitic nematodes	VII	399
Gaigeria aspera.		
Chemical studies upon the Vermeerbos, <i>Geigeria aspera</i> , Harv. I. Isolation of a bitter principle "Geigerin"	VII	485
II. Isolation of the active principle "Vermeeric acid"	VII	507
Gravid Uterus.		
Studies in sex physiology No. 17. The extent of the gravid uterus in relation to the vertebral column in the dorsal recumbent position and the weights of the gravid uterus and foetus in relation to the general body weight	VII	261
Hippobosca.		
Description of a new species of Hippobosca, <i>Diptera pupipara</i>	VII	67
Horsesickness.		
Studies on the neurotropic virus of horsesickness V. The antigenic response to simultaneous trivalent immunization	VII	11
Immunization of horses and mules in the field during the season 1934-35 with a description of the technique of preparation of polyvalent mouse neurotropic vaccine	VII	17
Immunity.		
The production of immunity to <i>Cl. chauvoei</i>	VII	143
Immunization.		
Studies on the neurotropic virus of horsesickness V. The antigenic response of horses to simultaneous trivalent immunization	VII	11
Horsesickness: Immunization of horses and mules in the field during the season 1934-35 with a description of the technique of preparation of polyvalent mouse neurotropic vaccine	VII	17
Iodine.		
Studies in mineral metabolism No. XXXV. The rôle of iodine in the nutrition of sheep	VII	523
Linognathus.		
New species of Linognathus and Polyplax (Anoplura)	VII	59
Mammalia.		
A synoptic check-list and host-list of the ectoparasites found on South African mammalia, aves and reptilia (Supplement No. 1)	VII	69
Mineral Metabolism.		
Studies in mineral metabolism XXXIV. The effect of sulphur upon the weight and wool production of sheep, when food intake is not limited	VII	181
Study No. XXXV. The rôle of iodine in the nutrition of sheep	VII	523

	VOL	PAGE
Mouse.		
Horsesickness: Immunization of horses and mules in the field during the season 1934-35 with a description of the technique of preparation of polyvalent mouse neurotropic vaccine	VII	17
Native Cattle.		
A contribution to the study of African Native cattle	VII	613
Nematodes.		
Anthelmintic tests, chiefly with tetrachlorethylene, for the removal of the hookworm, <i>Geigeria pachyscelis</i> , from infested sheep, with observations on the effects of this drug on other parasitic nematodes	VII	399
Neurotropic Vaccine.		
Horsesickness: Immunization of horses and mules in the field during the season 1934-35 with a description of the technique of preparation of polyvalent mouse neurotropic vaccine	VII	17
Neurotropic Virus.		
Studies on the neurotropic virus of horsesickness V. The antigenic response of horses to simultaneous trivalent immunization	VII	11
Nutrition.		
Mineral metabolism study No. XXXV. The rôle of iodine in the nutrition of sheep	VII	523
Oesophagostomiasis.		
A contribution to the study of the pathology of oesophagostomiasis in sheep	VII	277
Pasteurellosis.		
An outbreak amongst sheep	VII	113
Pathology.		
A contribution to the study of the pathology of oesophagostomiasis in sheep	VII	277
Photosensitisation.		
Studies on the photosensitisation of animals in South Africa IX. The bile flow of the merino sheep under various conditions ...	VII	349
Pink Tooth.		
The occurrence of congenital porphyrinuria (Pink Tooth) in cattle in South Africa (Swaziland)	VII	535
Plants.		
Recent investigations into the toxicity of known and unknown poisonous plants in the Union of South Africa	VII	169
Plant Studies and Poisonous Plants.		
Chemical studies upon the Vermeerbos, <i>Geigeria aspera</i> , Harv. I. Isolation of a bitter principle "Geigerin"	VII	485
Chemical Studies upon the Vermeerbos, <i>Geigeria aspera</i> , Harv. II. Isolation of the active principle "Vermeeric acid"	VII	507
Poisonous Plants.		
Recent investigations into the toxicity of known and unknown poisonous plants in the Union of South Africa	VII	169
Chemical studies upon the Vermeerbos, <i>Geigeria aspera</i> , Harv. I. Isolation of a bitter principle "Geigeria"	VII	485
Chemical studies upon the Vermeerbos, <i>Geigeria aspera</i> , Harv. II. Isolation of the active principle "Vermeeric Acid"	VII	507
Polyplax.		
New species of <i>Linognathus</i> and <i>Polyplax</i> (Anoplura)	VII	59

	VOL.	PAGE
Polyvalent.		
Horsesickness: Immunization of horses and mules in the field during the season 1934-35 with a description of the technique of preparation of polyvalent mouse neurotropic vaccine	VII	17
Porphyrinuria.		
The occurrence of congenital porphyrinuria (Pink Tooth) in cattle in South Africa (Swaziland)	VII	535
Some cases of congenital porphyrinuria in cattle; chemical studies upon the living animals and post mortem material	VII	567
Ration.		
Sulphur metabolism. II. The distribution of sulphur in the tissues of rats fed rations with and without the addition of elementary sulphur	VII	189
Sulphur metabolism. III. The effect of flowers of sulphur on the growth of young rats fed an otherwise well-balanced ration ...	VII	199
Rats.		
Sulphur metabolism. II. The distribution of sulphur in the tissues of rats fed rations with and without the addition of elementary sulphur	VII	189
Sulphur metabolism. III. The effect of flowers of sulphur on the growth of young rats fed an otherwise well-balanced ration ...	VII	199
Reptilia.		
A synoptic check-list and host-list of the ectoparasites found on South African mammalia, aves, and reptilia. (Supplement No. 1)	VII	69
Sex Physiology.		
Studies in sex physiology No. 14. The situation of developing foetus in the uterus of the live merino sheep	VII	227
Studies in sex physiology. No. 15. Further observations on the body weight and crown-rump length of merino foetuses	VII	239
Studies in sex physiology. No. 16. Surface area in the foetus of the merino sheep	VII	251
Studies in sex physiology. No. 17. The extent of the gravid merino uterus in relation to the vertebral columns in the dorsal recumbent position and the weights of the gravid uterus and foetus in relation to the general body weight	VII	261
Sulphur.		
Studies in mineral metabolism. XXXIV. The effect of sulphur upon the weight and wool production of sheep when food intake is not limited	VII	181
The distribution of sulphur in the tissues of rats fed rations with and without the addition of elementary sulphur	VII	189
The effect of flowers of sulphur on the growth of young rats fed an otherwise well-balanced ration	VII	199
The oxidation and reduction of elementary sulphur by animal tissues <i>in vitro</i>	VII	209
Tetrachlorethylene.		
Anthelmintic tests, chiefly with tetrachlorethylene for the removal of the hookworm, <i>Gaigeria pachyscelis</i> , from infested sheep, with observations on the effects of this drug on other parasitic nematodes	VII	399
Toxicity.		
Recent investigations into the toxicity of known and unknown poisonous plants in the Union of South Africa	VII	169
Trichodectidae.		
Notes on species of Trichodectidae with descriptions of new genera and species	VII	33

	VOL.	PAGE
Trivalent Immunization.		
Studies on the neurotropic virus of horsesickness V. The antigenic response of horses to simultaneous trivalent immunization	VII	11
Uterus.		
Studies in sex physiology No. 14. The situation of the developing foetus in the uterus of the live merino sheep	VII	227
Studies in sex physiology No. 17. The extent of the gravid merino uterus in relation to the vertebral column in the dorsal recumbent position, and the weights of the gravid uterus and foetus in relation to the general body weight	VII	261
Vermeerbos.		
Chemical studies upon the Vermeerbos, <i>Geigeria aspera</i> , Harv. I. Isolation of a bitter principle "Geigerin"	VII	485
Chemical studies upon the Vermeerbos, <i>Geigeria aspera</i> , Harv. II. Isolation of the active principle, "Vermeeric Acid"	VII	507
Vermeeric Acid.		
Chemical studies upon the Vermeerbos, <i>Geigeria aspera</i> , Harv. II. Isolation of the active principle "Vermeeric Acid"	VII	507
Vertebral Column.		
Studies in sex physiology No. 17. The extent of the gravid merino uterus in relation to the vertebral column in the dorsal recumbent position and the weights of the gravid uterus and foetus in relation to the general body weight	VII	261
Virus.		
Studies on the neurotropic virus of horsesickness V. The antigenic response to simultaneous trivalent immunization	VII	11
Wool.		
Studies in mineral metabolism XXXIV. The effect of sulphur upon the weight and wool production of sheep when food intake is not limited	VII	181
Zebus.		
Anatomical studies No. 61. A comparison of two of the so-called Zebus	VII	371
