

**Note to readers with disabilities:** *EHP* strives to ensure that all journal content is accessible to all readers. However, some figures and Supplemental Material published in *EHP* articles may not conform to [508 standards](#) due to the complexity of the information being presented. If you need assistance accessing journal content, please contact [ehponline@niehs.nih.gov](mailto:ehponline@niehs.nih.gov). Our staff will work with you to assess and meet your accessibility needs within 3 working days.

## **Supplemental Material**

### **Levels and Determinants of DDT and DDE Exposure in the VHEMBE Cohort**

Fraser W. Gaspar, Jonathan Chevrier, Lesliam Quirós-Alcalá, Jonah M. Lipsitt, Dana Barr, Nina Holland, Riana Bornman, and Brenda Eskenazi

#### **Table of Contents**

1. Quantification of *o,p'* and *p,p'*-DDT and DDE Isomers
2. Quality Control Results for VHEMBE Serum Analysis
3. Additional Results

**Table S1.** Propensity score distributions for estimating  $E(A|W)$  for assessing positivity violations.

**Table S2.** Algorithm weights used by SuperLearner to estimate  $E(Y|A, W)$

**Table S3.** Algorithm weights used by SuperLearner to estimate  $E(A|W)$ .

**Table S4.** *p,p'*-DDT and *p,p'*-DDE concentrations (ng/g-lipid) by selected characteristics in VHEMBE participants, Limpopo, South Africa.

**Table S5.** Comparison of VHEMBE lipid-adjusted serum concentrations with previously reported blood concentrations in adults living in IRS communities and pregnant women living in the United States

**Figure S1.** Directed Acyclical Graph (DAG) used to conceptualize the relationship between exposures and outcomes.

**Figure S2.** Spatial distribution of *p,p'*-DDE concentrations in relation to Tshilidzini Hospital
