Impact of the re-envisioned academic library on interlibrary loan services: the case of the Department of Library services, University of Pretoria

Maria Mtsweni, Rachel Mahlangu & Marguerite Nel

3 October 2017
Introduction
90% of all the world's data has been generated over just the last two years.¹

WE NOW CREATE AS MUCH DATA IN ONE DAY AS WE DID FROM THE DAWN OF CIVILISATION UP UNTIL 2003.²

There are over 5.5 bn google searches every single day. When it was first launched in 1998, it served 10,000 searches a day.⁴

The amount of data created is all the more astounding considering that the global internet population is just 3.17 billion, or under half the world's population.⁷

Facebook users share 2,460,000 pieces of content every minute of the day.⁵

If you burned all of the data created in just one day onto DVDs, you could stack them on top of each other and reach the moon and back - twice!⁶

Our digital universe already contains as many digital bits as there are stars in the universe.⁴

It would take over 5 years to watch the amount of video that will cross global networks every second in 2015.⁹

Every second, on average 6,000 tweets are posted to Twitter.¹⁰

Today, if a byte of data were a gallon (4 litres) of water, in only 10 seconds there would be enough data to fill an average house. In 2020, it will only take 2 seconds.⁹

48,000 apps are downloaded from the Apple App store every minute of the day.¹¹

Academic libraries of today...
Issues affecting academic libraries today

- Open access
- Digitisation (e.g. backfiles of journals)
- Shared and cloud-based catalogues
- Mobile applications
- Library spaces
- Budgets
- Licence agreements

(ACRL, 2016; Posner, 2017)
Is ILL still relevant today?
What is Interlibrary loan services?

Information needs, information seeking behaviour and information use behaviour of researchers at the Faculty of Veterinary Science, University of Pretoria and how these needs are being met by the information support delivered by the Jotello F Soga Library
Quantitative findings regarding access to information:

73% respondents said finding information that is not in the library or available online is what makes the library successful.
Qualitative findings on what researchers think the library does well:

Help with article requests, help with database use, and providing online access to the multitude of journals we all need which is hugely appreciated!!

Unfortunately, I do my research in a remote area in the Free State, so I haven't been to the library yet. But I asked a couple of times for hard-to-find book chapters and she kindly and efficiently got the copies for me.

Speed of help with problems with obtaining articles or other information…

Finding articles, books, book chapters and so on when we did not have them...
Qualitative findings on what researchers think the library does well:

Being able to quickly obtain copies of papers that I can't find

Quick inter-lending service

...if these journals are not available online, one can actually request the library to source it for them...

They are tremendously helpful with getting reprints through interlibrary loans – especially old articles that are not available online. Obtaining old articles and other articles that are difficult to find electronically.
Qualitative findings:
what researchers think are the best skills of librarians:

She leads me to information need satisfaction; … knowledgeable …;
…help to discover (difficult to find) information;
They know all the different ways to find information;
Their skills to sourcing information are so important …;
Her knowledge and skills to manage and locate information saves time and frustration …;
They are skilled to buy and provide excellent information sources;
… knowledgeable in information management
In house survey on quality of document delivery

13/14 (92.9%) of the users rated our service at 90% or above during July 2017
I used to worry about books I couldn't get from main campus, but since I learnt about Interlending, it has been easier to get the books I need. Big-up, Interlending is convenient and worth mentioning, among other great services provided…

I am very impressed with the library service and interlibrary loan service, there are just a handful of article or textbooks that I sometimes feel are lacking, but this is understandable as you cannot have everything available …
2017 LibQual results (cont.)

Very impressed with the interlending service, online system and wide access to journals which is critical to my research. Thank you

I would appreciate it if the library had some more books in my discipline. Currently I rely a lot on interlending.

In general I am very happy with the service the library provides. Most literature is available through the library or can be ordered through interlibrary loan.
ILL is definitely still relevant today!
Future of ILL
Future of ILL

- Embrace change
- Focus on user needs
- Collaboration & Partnerships
Focus on user needs

Information available to user

Users have access to more information (e.g. open access, library collections)

Information sources discovered on shared catalogue (e.g. OCLC WorldShare Discovery)

Users discover more information sources to which they do not have access to

Request from ILL
Focus on user needs

- Focus on user satisfaction
  - Speed of delivery (turn around time)
  - Ease of access (delivery method, e.g. email, article exchange)
  - “Walk the extra mile”

- Experts / specialists in finding information
  - Need to develop skills
  - Keep on learning
  - Keep up to date with new developments, products, tools, etc.
  - Need to be informed on copyright issues and licence agreements
Collaboration and partnerships

Internal (other units, branches)

External
Examples of external partnerships

• Vendors (licence agreements)
• OCLC / SABINET (training, new developments)
• German library
• VetLibL
Embrace change

Technology is nothing. What's important is that you have a faith in people, that they're basically good and smart, and if you give them tools, they'll do wonderful things with them.

(Steve Jobs)
Examples of how technology can assist ILL

• Digitisation of special collection items or theses
• New ways to communicate (e.g. Whatsapp, sms, Facebook, Twitter)
Conclusion
Thank you
