Appendix 1

Questionnaire for bushmeat hunters

Hello, my name is _____________________ and I am a researcher with the Botswana Predator Conservation Trust. I am here today because I would like to interview you as part of a project to understand the social and economic roles that hunting and wild meat consumption play in local communities. We would also like to ask questions about hunting so that we can better understand the practice. The survey is voluntary, and if you agree to participate, you may decline to answer any questions or end the interview at any time. All responses will be kept strictly confidential and all interviewees will be anonymous. Information will not be used against you in any way, including regarding illegal activities. We are here merely so that we can understand the community’s perspective on the hunting tradition and how important it is to your livelihood. The interview will take approximately 45 minutes.

Are you willing to participate in this research?
