

## Supporting Information S2 — Individual tracking dataset summaries

Table S2.1: Summary statistics for each of the individual tracking datasets used in the analyses in the main text. Sampling intervals are reported in minutes, and the sampling duration in days. Consistent refers to whether or not the individual exhibited consistent movement behaviour between the first and second halves of the sampling period (see main text for details).

Species	Individual ID	Country	Consistent	Interval	Start Date	End Date	Duration	Locations
<i>Acinonyx jubatus</i>	Flirty	Botswana	N	0.02	2/9/12	2/17/12	8.1	102143
<i>Acinonyx jubatus</i>	Lisette	South Africa	N	0.02	3/17/12	4/16/12	30.1	107081
