

# Appendix 1: Colony Inter-nest Maps

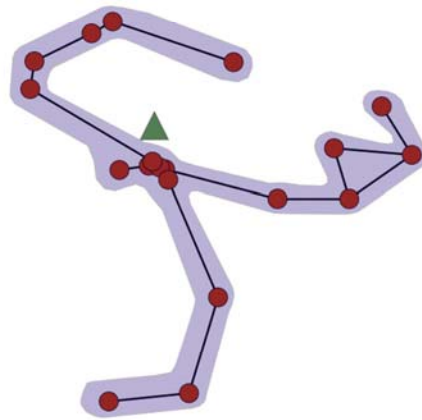

6 2016 (C)

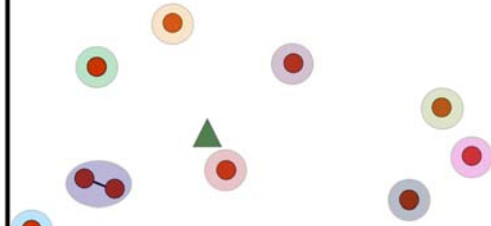

6 2017 (C)

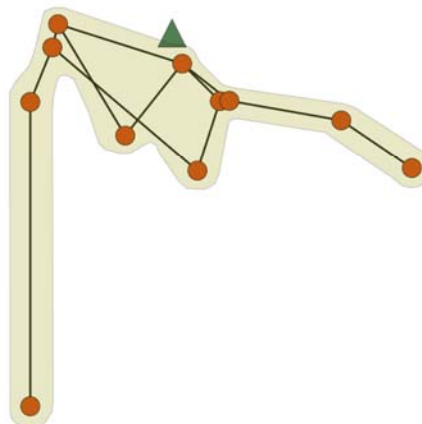

7 2016 (T)

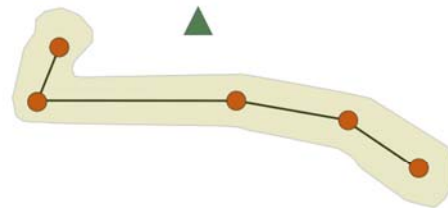

7 2017 (T)

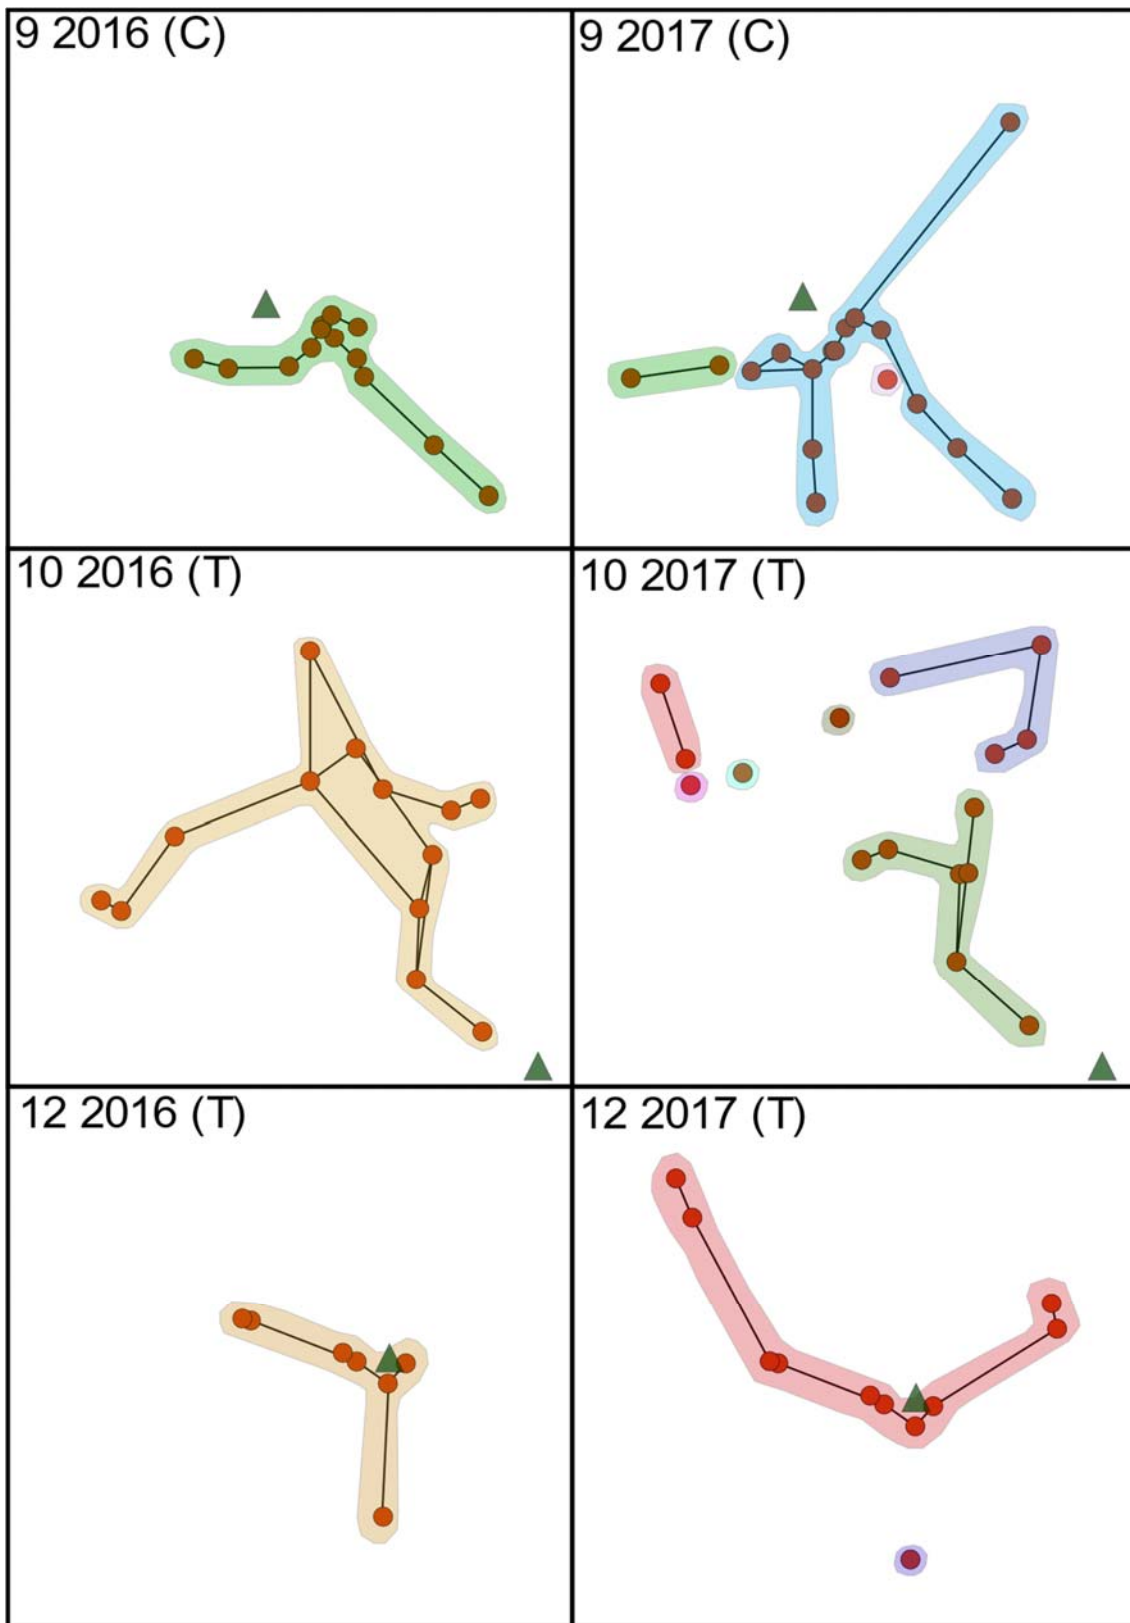

8 2016 (C)

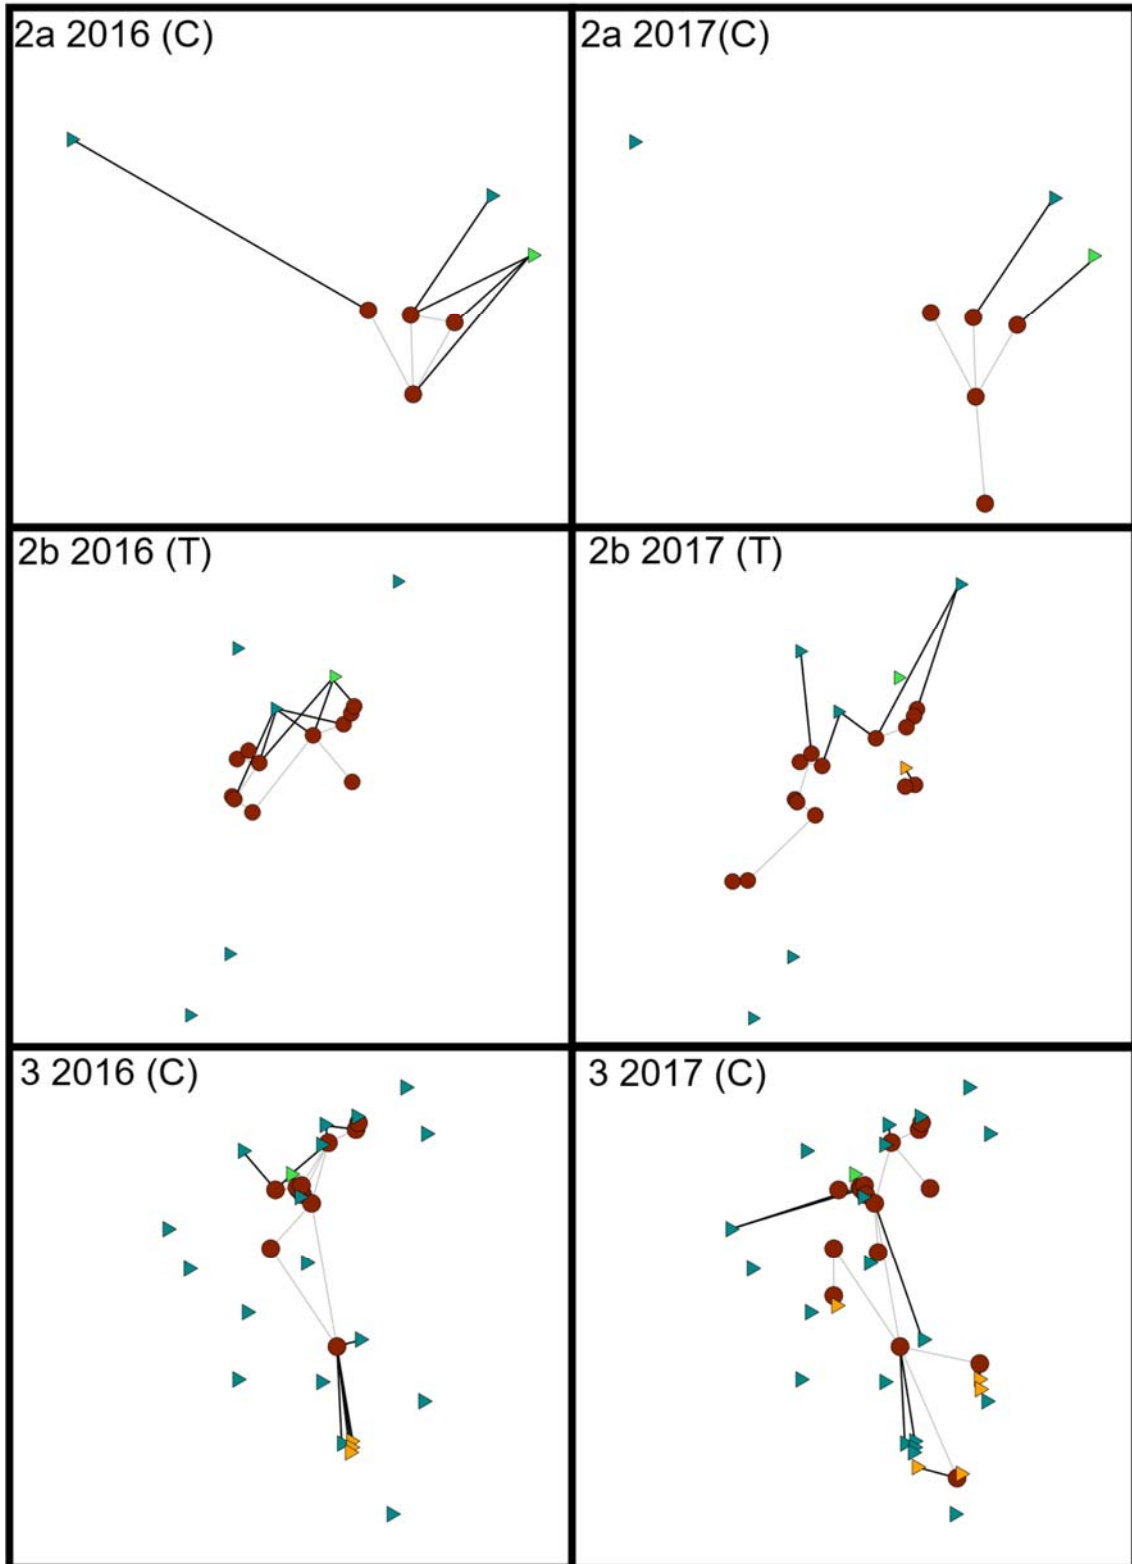

8 2017 (C)

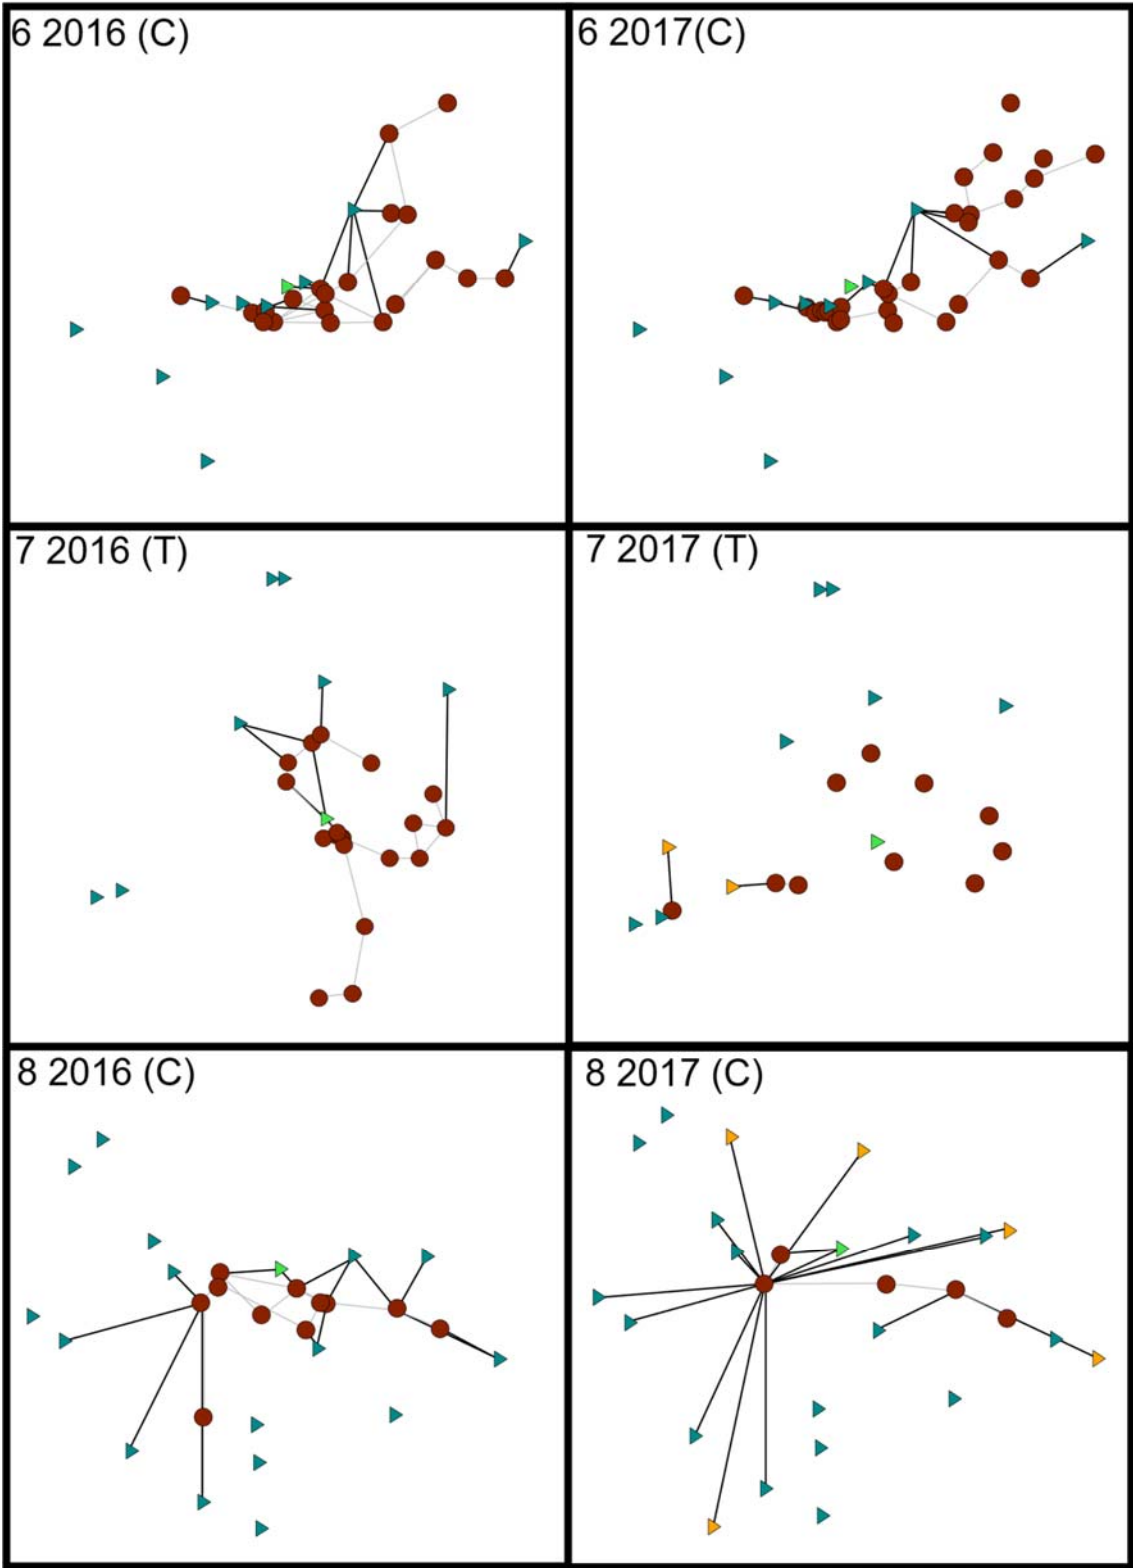

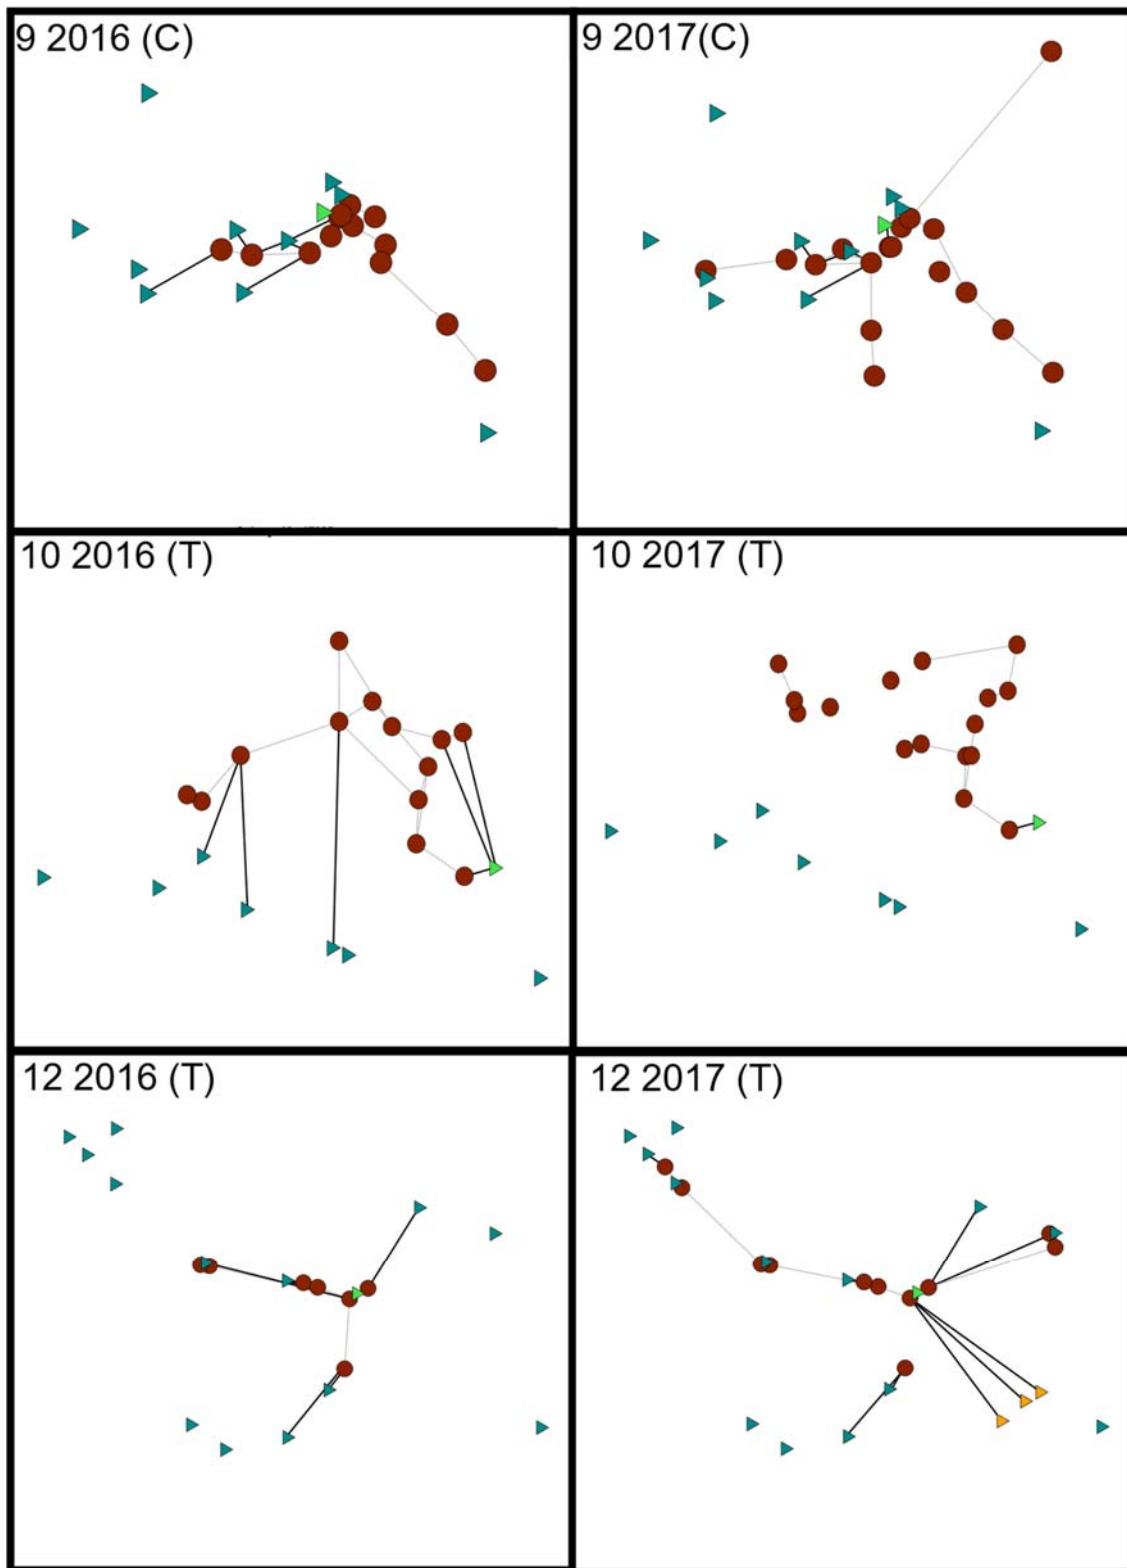

**Figure A1.1.** Colony maps before (2016) and after (2017) focal trees were either excluded in treatment condition (indicated with T) or unchanged in control conditions (indicated with C). Red nodes indicate nests, black edges indicate trails, green triangles indicate focal trees and coloured polygons indicate independent network components.

## Appendix 2: Colony foraging Maps

**Figure A2.1. Colony foraging maps before (2016) and after (2017) focal trees were either excluded in treatment condition (indicated with T) or unchanged in control conditions (indicated with C). Red nodes indicate nests, black edges indicate foraging trails, grey edges indicate inter-nest trails, bright green triangles indicate focal trees, yellow triangles indicate newly foraged trees and blue tree indicate trees that were neither new or focal.**
