HOUSE GOOSEN
SILVER LAKES

THE BRIEF
The clients requirements were for the dwelling to be modern, aesthetically pleasing and have an open floor plan without the need to subdivide the flat roof area throughout.

THE SOLUTION
The original flat roof area is currently under constrained in the writings of Silver Lakes. The area of Silver Lakes is known for its sloping terrain, and the sloping site will support the structure with the aid of regular slope. The site is relatively flat with an area of 60m², and 57m² will be building.

The architectural design of an unobstructed, open floor plan with large windows and sliding doors brings the room into the landscape and swimming pool area. At ground level, an eye-catching water feature leads you through the front entrance where the guest toilet and open plan living areas are located and the kitchen beyond. Visual synergy is achieved through the careful combination of finishes, colours and designs that float on stairs with the minimalist window. Custom-made aluminium windows and sliding folding doors bring the outdoor into the interior, and the dining room, which opens up. The upper level consists of two bedrooms with en-suite bathrooms. The main bedroom having a covered patio that overlooks the front entrance. The client being an art collector will put the pieces in the niche to complement the dwelling.
