

Supplementary Table S3. mtCOI sequence-based single nucleotide polymorphism between different lineages in *D. siricidicola* populations.

Lineage	Number of strains	Site 23 <sup>a</sup>	Site 208 <sup>a</sup>	Site 314 <sup>a</sup>	Site 385 <sup>a</sup>
A	30	C	T	C	C
B	65	C	C	C	T
C	17	C	C	T	C
D	59	T	C	C	C

<sup>a</sup>Site: refers to the nucleotide position starting at position 1 of the mtCOI gene.
