Table S6. Area under disease progress curve on 3-day interval for three treatments and sum of area under disease progress at 30 dpi across six planting dates. PD refer to planting date, dpi refers to day(s) post inoculation -ve refer to negative and +ve refer to positive. The -ve control didn't have any disease symptoms, hence the score zero from 3dpi to 30 dpi.

PD	Treatment	Cumulative AUDPC at different days post inoculation										AUDPC
		3	6	9	12	15	18	21	24	27	30	sum
