## **Title:** Nursery Tales, Traditions, and Histories of the Zulus in their Own Words: With a Translation into English, and Notes by the Rev. Canon Callaway. Volume 1

### **Description**

*Nursery Tales, Traditions, and Histories of the Zulus in Their Own Words* is a compilation of Zulu literature gathered by the Reverend Henry Callaway (1817–90) in the Natal region of South Africa in the late 1850s and 1860s. Callaway left the United Kingdom in 1856 to become a Church of England missionary. In 1858 he settled near the Umkomanzi River in Natal and began to study the Zulu language, religious beliefs, and oral traditions. As Callaway mastered the language, he wrote down tales dictated to him by native storytellers. The English translations of the stories appear in parallel sections next to the original Zulu text. Callaway was intensely committed to recording as accurately as possible the particularities of the Zulu language and literature, as they had been before any exposure to European influences, but he was also impressed by the "unexpected relationships" between Zulu tales and corresponding legends among other peoples. These relationships, he wrote in the preface to the work, "will more and more force upon us the great truth, that man has every where thought alike, because every where, in every country and clime, under every tint of skin, under every varying social and intellectual condition, he is still man..., one in his mental qualities, tendencies, emotions, passions."

## ABLESpace

African Buildings and Landscape Environment  
IR Digital Collections - University of Pretoria  
Department of Architecture

ABLESpace, the Institutional Repository Digital Collections of the Department of Architecture, is a multi-faceted project that aims to record, digitise, archive and document material, landscapes, structures, spaces and objects of architecturally historical research value in order to disseminate information and promote research in the field.

Our collection is constantly evolving, providing new material to the researcher. As a team dedicated to open-access full text research data we provide this material to all with the request that the source always be acknowledged in any output that utilises our resources.

# InfoMania

June 2012

### FROM THE DESK OF THE EDITOR:

Welcome to this somewhat late first issue of Infomania in 2012.

This first issue contains a lot of interesting reading material and figures.

The International Ranking of the University of Pretoria is discussed as well as suggestions how you as researcher can contribute towards a higher ranking.

The most useful bibliographic database for the Veterinary Science discipline is still CAB Abstracts. We are still subscribed to it but decided to move it to another platform. We give a quick overview of the features offered by die Web of Knowledge platform which we think can be very useful.

More and more books and journals are made available in electronic format – even older archival issues of journals. We introduce a new collection of archival journal issues, which we bought with some of this year's allocated book funds, as well as to new electronic book collections.

To round of this issue we display some very interesting UPSpace (University of Pretoria's repository) statistics. Look how well the Veterinary Science items are used.

We really hope that this issue will provide some hot reading on a cold winter day. As always any comments or suggestions is more than welcome.

**Tertia Coetsee (Editor)**

This newsletter is also available electronically at
