

betweeness

By
Mona Burger

Submitted in fulfilment of part of the requirements
for the degree of Masters of Interior Architecture
(Professional) in the Faculty of Engineering, Built
Environment and Information Technology,
University of Pretoria, South Africa.

November 2008
Study Leader:
Raymund König

Boundary/n.

Something that indicates bounds or limits; a limiting or bounding line.

Discipline /n.

A branch of instruction or learning, but within the same profession.

Information /n.

That which is known about a specific subject or situation.

Knowledge derived from study, experience or instruction.

Knowledge of specific events, or situation that has been gathered or received by communication – intelligence or news.

A collection of fact or data.

The act of informing or the condition of being informed.

Profession/n.

A distinct vocation or calling with specialist knowledge.

Translate /v.

To express in another language, while systematically retaining the original sense.

To change into a different form, substance, or state.

To express the meaning of in other, especially simpler, words.
