

Scenario “KoGu rejected”

Description: So far the reference model only considers the scenario when the KoGu is accepted (Happy Path). It might be the case, that the KoGu is rejected by the Health Insurance and this has consequences in the model.

Two possible scenarios for rejection could be:

1. DefReha Criteria are not well applied for a patient and thus they need to be re-applied
2. Some information on the KoGu was missing and thus the KoGu needs to be reworked

Task: Please extend the provided model(s) with the two scenarios.
