Reject Case

Accept Case

The Patient Dispo can accept the case only after the proposed date is entered

If the case is accepted the following 3 actions will be performed: 1) An email is sent to the Transferal Manager stating that the case has been acceppted from the Administrative point of view. 2)The Acceptance Status of the process "Case Accepted" is ticked 3)An email is sent to the Responsible Physician that in turn should either accept the patient or reject.

Neurological Rehab

Interface

From acute hospital to inpatient neurological reha

From reha with compulsory medical monitoring to inpatient neurological reha

From acute hospital to a reha with compulsory medical monitoring

Admission Criteria into inpatient neurological reha (all criteria need to be ticked to discharge the patient)

☒ The patient mainly has a clear awareness

☒ Patient is able to actively participate in activities in more rehabilitative therapy sessions of about 30 minutes

☒ Patient is able to interact and communicate, also by means of support devices

☒ Patient is able to move, about 3-4 hours per day in wheelchair

☒ Patient mainly needs support for daily life activities

☒ Patient does not need rehabilitation with compulsory medical monitoring; risk of complication is low

Exclusion Criteria from inpatient neurological reha (if criteria is ticked patient must not be admitted)

☐ Acute worsening of the patient's health conditions, i.e. confused patient and uncooperative
