1	Submission Date	By selecting the "Yes" option I hereby voluntarily grant my permission for participation in this anonymous survey. I understand my right to choose whether to participate in the research project and that the information provided will be handled confidentially. I am aware that the results of the survey may be used for academic publication.	1. What is your job title?	2. Do you believe sustainability should be focused on?	3. Where do you think will be the most important place to adopt a more sustainable means?	4. Which items do you recycle, repair or re-use in your personal life?	5. Which items do you recycle, repair or re-use in your professional life?	6. Which of the following factors will convince you to buy/use sustainable products?	7. Are you willing to change your habits to be more sustainable?	8. Do you think that the benefits of economic growth and development should outweigh the costs to the environment?	9. Do you believe that governments should take a more active role in promoting sustainability, even if it means limiting individual freedom of choice or imposing strict regulations?	10. How do you respond to information or media that challenges your views on sustainability and the environment?	11. Please select the options below that best represent your answer for each statement >> How informed are you about sustainability issues?	11. Please select the options below that best represent your answer for each statement >> How confident are you in your ability to make environmentally friendly choices in your daily life?	12. Please select the options below that best represent your answer for each statement >> Would you spend more money to buy repaired, re-used or recycled products than new ones?	12. Please select the options below that best represent your answer for each statement >> How willing are you to make changes to your lifestyle or consumption habits in order to support sustainability and protect the environment?	12. Please select the options below that best represent your answer for each statement >> How much do you believe that cognitive biases can impact the success or failure of circular economy initiatives?	13. Please select the options below that best represent your answer for each statement >> How often do you make an effort to reduce your carbon footprint or limit your use of single-use plastics?	14. Please select the options below that best represent your answer for each statement >> Do you agree with the following view: Is it imperative to reduce the use of fossil fuels in our daily lives, by increasing the demand for sustainable products?	14. Please select the options below that best represent your answer for each statement >> Do you agree that it is important that society follows environmentally friendly practices?	14. Please select the options below that best represent your answer for each statement >> Do you agree with the following view: There is no proper manner to change the awareness of the public for the establishment of a more sustainable reality?	14. Please select the options below that best represent your answer for each statement >> Do you think it is important for individuals to take action to reduce their impact on the environment?	14. Please select the options below that best represent your answer for each statement >> To what extent do you believe that environmental problems can be solved through technology and innovation?	14. Please select the options below that best represent your answer for each statement >> To what extent do businesses should prioritize sustainability in their decision-making?	14. Please select the options below that best represent your answer for each statement >> To what extent do you think that climate change is caused by human activity?	14. Please select the options below that best represent your answer for each statement >> To what extent do you believe that cognitive biases influence decision-making in the adoption of circular economy principles and practices?	14. Please select the options below that best represent your answer for each statement >> To what extent do you think that cognitive biases play a role in the resistance to change and adoption of circular economy practices?
2	Aug 26, 2023	Yes	Utilities Engineer	Yes	Product manufacturing Mining Farming	Grocery bags, Plastic water bottles	Water used during the cleaning of pharmaceutical manufacturing equipment	Green information availability on labels Green information accuracy on labels Reduced cost Re-usability Better quality	Yes	No	Yes	Research more about the topic, try to understand the motive of individual or organisation presenting the information (whether profit-motivated or otherwise). For example, by researching donors etc	Good	Good	Very likely	Very likely	Somewhat likely	Sometimes	Strongly Agree	Strongly Agree	Disagree	Strongly Agree	Agree	Strongly Agree	Strongly Agree	Agree	Agree

70	Jul 17, 2023	Yes	Reliability Engineer	Yes	Personal lifestyle Product manufacturing Mining Farming Food industry	None	None	Re-usability Better quality	Yes	No	Yes	One tries to re-evaluate your own way of doing and think about you can make a difference, but it becomes a challenge if there is no local sustainability support network or set systems in place to promote more sustainable living. Proper recycling networks are lacking in my local society so one still ends up throwing away and wasting a lot.	Good	Average	Somewhat likely	Somewhat likely	Somewhat likely	Sometimes	Agree	Strongly Agree	Disagree	Agree	Agree	Agree	Strongly Agree	Agree	Agree
71	Jul 17, 2023	Yes	Engineer	Yes	Product manufacturing Mining Food industry	I recycle all my glass, paper and plastic items at home, I re-use the same water bottle at work and home, and I try to repair household items before really having to replace them.	I recycle the papers that I printed if I am done with it, I try to use as less paper as possible. I re-use the same water bottle at work.	Reduced cost Re-usability Better quality	Yes	No	No	if financially possible, it is obtainable. However, a lot of sustainability measures are out of reach for a lot of people due to how expensive it is. E.g., solar, it is great to have it installed for the aspects of sustainability and environmentally friendly, however, it is a large financial decision that most people can't make due to the state of the economy.	Average	Poor	Somewhat unlikely	Somewhat likely	Somewhat likely	Sometimes	Agree	Agree	Neither agree nor disagree	Agree	Agree	Agree	Strongly Agree	Strongly Agree	Strongly Agree
72	Jul 17, 2023	Yes	Snr Mechanical Engineer	Yes	Product manufacturing	All garden waste get's re-integrated back into garden, kitchenwaste worked into gardenbeds, old bedding and materials used as rags, cans and bottles recycled.	Printing paper for additional notes	Reduced cost Re-usability	Yes	Yes	Yes	Depending on what information is being challenged. Sustainable technological advancements are welcomed and how it can reduce costs or manufacturing. Forcing the same tight restrictions on developing countries reliant on non-sustainable technologies and effectively penalising them for practices that was done by developed countries without penalty is more negatively received.	Good	Good	Very unlikely	Somewhat likely	Somewhat likely	Often	Agree	Agree	Disagree	Agree	Strongly Agree	Agree	Strongly Agree	Neither agree nor disagree	Agree
73	Jul 17, 2023	Yes	Mechanical Engineer	Yes	Personal lifestyle Product manufacturing Mining Food industry	Recycle - Most products that can be recycled. Repair - Anything within my DIY capabilities Re-use - Plastic containers for seedling pots etc.	Recycle - Most products that can be recycled. Repair - Unfortunately in my professional life I am not allowed to repair anything that I am not declared competent on. Re-use - Unfortunately in my professional life several equipment such as PPE is seen as once-off use due to the perceived risks of re-use. This results in a lot of wastage in the name of safety.	Green information accuracy on labels	Yes	No	No	I challenge myself to always be open minded, but also question the media narrative - everyone has an agenda.	Good	Good	Somewhat unlikely	Somewhat likely	Somewhat likely	Often	Agree	Strongly Agree	Neither agree nor disagree	Strongly Agree	Strongly Agree	Agree	Neither agree nor disagree	Agree	Agree
74	Jul 17, 2023	Yes	Mechanical Engineer	Yes	Personal lifestyle Product manufacturing Food industry	Glass, paper based refuse.	Paper and batteries	Green information accuracy on labels Re-usability Better quality	Yes	No	Yes	The media is often misguided and then misleads the public. The earth is not a pile of resources to be pillaged as we see fit, it is a living organism from which you sprouted, as a piece of the earth. When you die you will realise your body is only earth... Therefore we should start acting like the stewards we are supposed to be to this beautiful and only planet we call home, Gaia, Mother Earth.	Good	Good	Somewhat likely	Somewhat likely	Very likely	Often	Strongly Agree	Strongly Agree	Strongly Disagree	Strongly Agree	Strongly Agree	Strongly Disagree	Disagree	Agree	Agree
