

Logistics Management in the Information Technology Industry

by

Martha Magdalena Visagé

submitted as partial completion of the requirements for the degree

Master in Business Management

Departments of Business Management

University of Pretoria

Study leader: Professor de Wit

2001

Acknowledgements:

I would like to thank everybody that has made the writing of this dissertation possible: first and foremost to both my parents whose support and encouragement throughout my life has made me the person I am today – their unconditional love has been without equal; and also to my friend Casper for his endless patients and understanding through the many months of research and planning. Thanks also to Professor de Wit for his leadership, knowledge and insight. A special word of thanks and appreciation also goes out to my employer, where my interest and understanding for this complex industry and its processes were born and nurtured. Most importantly, I would like to thank the Lord for giving me the opportunity, ability and means to have made this dream come true.

TABLE OF CONTENTS:

CHAPTER 1

THE INFORMATION TECHNOLOGY CHANNEL	1
1.1 Introduction	2
1.1.1 Problem statement	2
1.1.2 Objective of the research	2
1.1.3 The information technology industry	3
1.2 The importance of the IT industry	4
1.2.1 The changing business environment	4
1.2.2 The people factor	4
1.3 Worldwide IT trends	4
1.3.1 The South African situation	4
1.3.2 The African continent	6
1.4 IT outsourcing	6
1.5 Research methodology	7
1.6 Contents of the dissertation	8
1.7 Summary	10

CHAPTER 2

OUTSOURCING THE SUPPLY CHAIN	11
2.1 Introduction	12

2.2	Managing existing business paradigms	12
2.2.1	Discontinuous business change	12
2.2.2	Changing the mindset	13
2.2.3	Maintaining a competitive advantage	16
2.2.4	Complete transformation	17
2.3	Evaluating the current channel strategy	19
2.3.1	Forecasting	20
2.3.2	Static and strategic components	22
2.3.3	Benchmarking	23
2.4	Adding value through outsourcing	25
2.4.1	Collaborating with strategic business partners	25
2.4.2	Outsourcing integration driven by management	28
2.4.2.1	Management capabilities	28
2.4.2.2	Key success factors	29
2.5	Supply chain management	31
2.5.1	Collaborating the supply chain	31
2.5.1.1	Present channel inefficiencies	31
2.5.1.2	Possible success factors	33
2.5.2	Supply chain integration	34
2.5.3	Intelligent supply chains	37
2.6	Fulfilment	38
2.7	Summary	39
<u>CHAPTER 3</u>		
A THEORETICAL BREAKDOWN ON FULFILMENT		41
3.1	Introduction	43

3.2	Creating a new product	43
3.2.1	Design of the new product	43
3.2.1.1	Reasons for the development of new product concepts	43
3.2.1.2	Product components	48
3.2.2	Creating the Bill Of Material	50
3.2.2.1	Assigning part numbers to components	50
3.2.2.2	An Indented Bill Of Material dissected	51
3.2.2.3	Aspects related to the use of a Bill Of Material system	56
3.3	Component procurement	60
3.3.1	In-house manufacturing	60
3.3.2	Procuring components from strategic partners	60
3.4	Assembly	63
3.4.1	Building the new product in a warehouse	63
3.4.2	Just-In-Time manufacturing	64
3.4.3	Quality control and protection of intellectual property	66
3.5	Warehousing	68
3.5.1	Materials handling	68
3.5.2	Managing a warehouse	69
3.5.3	People issues	74
3.5.4	Designing a functional warehouse	75
3.5.5	Warehousing by the fulfilment house on behalf of the client	79
3.5.6	Geographic location	82
3.5.7	The future of warehouses	87
3.6	Physical distribution	89
3.6.1	Mode of transport	89
3.6.2	Distribution by the fulfilment house in-house or outsourcing	92
3.6.3	Specialist distributors	95
3.7	Reporting	96
3.7.1	The Management Information System	96

3.7.2	Order processing	100
3.7.3	Shipment reporting	101
3.7.4	Serial tracking	101
3.7.5	Invoicing	102
3.7.6	Management of receivables	102
3.8	Summary	103

CHAPTER 4

	RESEARCH METHODOLOGY	104
4.1	Introduction	105
4.2	Properties of the research	105
4.2.1	Rational and empirical thinking	105
4.2.2	Different thinking styles	106
4.2.3	The role of a hypothesis	108
4.3	The research methodology	108
4.3.1	Identifying the topic to be researched	108
4.3.2	Exploration and judgement of the situation	109
4.3.3	Designing the research study	109
4.3.4	Sampling and data capturing	110
4.3.5	Evaluation and interpretation of the researched information	112
4.3.6	Writing the research thesis	113
4.4	Summary	113

CHAPTER 5

	CONCLUSIONS AND RECOMMENDATIONS	114
5.1	Introduction	115

5.2	Conclusions	115
5.2.1	Market and industry drivers	115
5.2.2	Fulfilment house services	116
5.2.3	South African players	118
5.2.4	Benefits of outsourcing to a fulfilment house	119
5.2.5	The role of suppliers	121
5.2.6	The fulfilment house client	123
5.2.7	Current technologies	125
5.2.7.1	E-commerce	125
5.2.7.2	Wireless Application Protocol	128
5.3	Recommendations	128
5.3.1	The client as the most important asset	129
5.3.2	Improving technologies	131
5.3.2.1	E-commerce	131
5.3.2.2	Wireless Application Protocol	133
5.4	Summary	134
	APPENDIX	135
