Peirce, C.S. (1902), *Application to the Carnegie Institution, see MS L75.329-330, from Draft D of Memoir 27*: “Consequently, to discover is simply to expedite an event that would occur sooner or later, if we had not troubled ourselves to make the discovery. Consequently, the art of discovery is purely a question of economics. The economics of research is, so far as logic is concerned, the leading doctrine with reference to the art of discovery. Consequently, the conduct of abduction, which is chiefly a question of heuritic and is the first question of heuritic, is to be governed by economical considerations.”
