

S4 Table. Comparison of standard errors (SE) and coefficients.

Variable	Mean difference	Estimate	Standard error	95% Confidence interval
SE of effects of knowledge	Univariate-Multivariate	-0.024	0.337	(-0.712, 0.663)
SE of effects of attitude	Univariate-Multivariate	-0.040	0.309	(-0.669, 0.589)
SE of effects of practice	Univariate-Multivariate	-0.017	0.136	(-0.293, 0.258)
Coefficient of age (18–30)	Attitude-Practice	4.218	3.111	(-1.899, 10.334)
Coefficient of age (31–45)	Attitude-Practice	3.085	3.139	(-3.088, 9.258)
Coefficient of secondary education	Attitude-Practice	-2.066	1.028	(-4.088, -0.044)
Coefficient of higher education	Attitude-Practice	-3.536	1.598	(-6.677, -0.395)
Coefficient of student	Attitude-Practice	1.442	2.967	(-4.391, 7.274)
