The Premiums are payable yearly in advance; or, at the option of the Assured, half-yearly, with a slight increase of the Rate.

The Capital and Profits of the Institution are the ENTIRE PROPERTY of the Holders of Policies of Insurance.

The Profits will be divided amongst the Holders of Policies, at the termination of every period of THREE YEARS, after the year 1850, when the first distribution will take place; and each Holder may determine that his Share shall be added to the sum assured by him,—or converted into a present payment;—or applied in reduction of the future annual Premiums payable by him.

The *pecuniary* advantages, therefore, are the *greatest* that can be secured to Policy-holders in any Institution of this nature.

Any Person whose Life is assured, and who has paid Five Annual Premiums, may proceed direct to any part of this Colony, and to any dependency thereof;—and to any part of Europe in time of peace, at his pleasure.

Any Person whose Life is assured may proceed direct to any part of this Colony, and to any dependency thereof, by sea and by land, at his pleasure.

For those who have not paid Five Annual Premiums, a Licence from the Board of Directors, *but no additional Premiums*, is required, when they proceed *beyond* the limits of this Colony and the dependencies thereof.

No Institution of this nature, it will therefore be seen, can reasonably consult the *convenience* of the assured to a greater extent.

By comparing the Rate or Scales of Premiums, the Public will perceive that those adopted by this *Society* are lower than those adopted by any of the respectable and safe *Companies*, in which, of course, a proper return for *paid-up Capital*, for *risks*, with *profit* to the *Shareholders*, must be provided for, as well as the benefit of the Assured or Policy-holders.

In this Society the *Members* and *Policy-holders* being the only *Shareholders*, receive back directly whatever excess of Rate the Tables may still retain. Every error, therefore, fully corrects itself;—and in this respect, also, MUTUAL ASSURANCE SOCIETIES excell all others.

The Principle and Tables of the Scottish Equitable Life Assurance Society have been adopted; and that Society, in the course of only *thirteen years* from the commencement, after meeting all demands, sets forth, that its “NET REALIZED FUNDS amount to £263,719. 6s. 8d.”—*although in Scotland the Rate of Interest is more than FORTY PER CENT. LOWER THAN AT THE CAPE.*

Having ascertained, from many years experience, that the Cape Wines, manufactured by fermenting the natural Juice, without the Husks, &c. are the most approved, has always endeavoured to obtain Wines of that peculiar quality, for which the grower not only received a preference, but also a higher price; he therefore takes the liberty of acquainting Captains of Ships, and his Customers in this Colony, as well as abroad, that he has always on sale, a choice Stock of Old Cape Wines of superior quality, consisting of Madeira, Sherry, Hock, Aromatic Hock, Pontac, equal, and in many respects preferable, to the Port Wine generally imported into this Colony; sweet Wines of very excellent quality and fine flavour, to wit: Pontac, Frontignac, Muscadel, &c., not to be equalled, and which have already undergone that perfecting progress by which they are not liable to that change to which all exported sweet Wines are more or less subject, whereby the Stranger is in many instances disappointed, and the Article disapproved of.
