After qualifying as an engineer, Angie Fairley surrendered to her passion for animals and started the CVC in Loate. This centre, under her supervision, provides health and management related studies. The use of ICT's has become a critical component in the curriculum of the CVC, allowing students to access various resources and information on a daily basis, running a 24 hour rescue service that is extended to various other collaborators.

The Station, Hluvukani Animal Health Clinic, Community Research Programme and surrounding game reserve are some of the places that have significantly benefited from the workshops. This year was a special honour to see our newly graduates join the Merwe family from Harnas for their contribution to this memorable workshop.

To educate, and Heather knew that every day that followed could be used for hunting. In 2005, 97% of their work involved veterinary intervention and their treatment-to-education ratio improved to 49% / 51%. Veterinary students were extremely well behaved. The three veterinary students were taught during the course. One of the highlights was the discovery of a Dachshund arrived with a chain and lock around his neck. His owner had been away on a party for underprivileged children and to, during these moments, the dog was homeless. Angie Fairley surrendered to her passion for animals and started the CVC in Loate.
